About this guide

In this user guide, we use the following symbols to indicate useful and important information:

- **This is a note.** A note often gives additional information, such as what happens when you choose to do or not to do a certain action. A note also provides information that may only be applicable to some situations.

- **This is a tip.** A tip gives you an alternative way to do a particular step or procedure, or lets you know of an option that you may find helpful.

- **This indicates important information** that you need in order to accomplish a certain task or to get a feature to work properly.

- **This provides safety precaution information,** that is, information that you need to be careful about to prevent potential problems.

Some apps may not be available in all regions or with your mobile operator.
Important RF Notice

This device was tested for compliance with the applicable FCC and Industry Canada specific absorption rate (SAR) limits for radio frequency (RF) exposure during typical body-worn operations. To ensure that RF exposure levels remain at or below the tested levels, use a belt-clip, holster, or similar accessory that maintains a minimum separation distance of 1.0 cm between your body and the device, with either the front or back of the device facing towards your body. Such accessories should not contain any metallic components. Body-worn accessories that do not meet these specifications may not ensure compliance with applicable SAR limits and their use should be avoided.
Important note on recoverable data

Files and other data that have been deleted, cleared, removed, or erased from your device may still be recoverable by third-party data recovery software. Even a factory reset may not permanently erase all data from your mobile device, including personal information.
Features you’ll enjoy

Convenient, single-handed operation
It’s easy to operate HTC U11 life with one hand. Here’s why.

Swipe for apps and notifications
Anywhere on the Home screen, just swipe up to access all your apps and swipe down to view your notifications.

Use any app with a squeeze
Edge Sense enables you to gently squeeze the sides of your phone to access any app, take photos or video, launch a voice assistant, and much more with one intuitive gesture, even in the rain.

To find out more, see Edge Sense on page 12.

Wake up your phone by just lifting or tapping it
To wake up your phone from sleep mode, you can do any of the following:

- Tap on the fingerprint scanner to wake up the screen. If you’ve added your fingerprint, tapping the fingerprint scanner unlocks your phone, bypassing the security screen. See Fingerprint scanner on page 29.

- Use Motion Launch™ to wake up the screen by double-tapping or swiping. See Motion Launch on page 43.
Edge Sense

HTC U11 life comes with a pressure-sensitive squeeze area on its frame. By squeezing the lower sides of HTC U11 life, quickly access your favorite app or shortcut even while your phone is in sleep mode.

In addition to taking camera shots and launching your chosen apps, you can assign the squeeze gestures to perform a tap or double-tap inside an app.

See What is Edge Sense? on page 50 to learn more.

Android 8.0

Android® 8.0 brings new features that make working with apps and settings even more convenient. Here’s an overview of some of its new features.

Picture-in-picture

Keep a small window of the video you’re watching or a supported app onscreen while you do other things on the phone. For most supported apps, just press the Fingerprint scanner/HOME to shrink the app to a small and moveable window at the bottom right of the screen. Move the window by dragging it or tap the window to see supported controls.
Not all apps support the Picture-in-picture feature. To check if an app is supported, go to Settings > Apps > Configure apps > Special app access > Picture-in-picture.

Snooze notifications

Temporarily dismiss notifications to free your Notifications panel or Lock screen from clutter.

For details, see Managing app notifications on page 42 or Lock screen on page 33.

Icon badges

Know right away if you have pending notifications for an app with icon badges. A small dot appears on an app icon which indicates there is a notification that you may have missed. Dots appear on app icons in both the All apps screen and on the Home screen. Press and hold the app icon to show a condensed version of the available notifications. See Turning icon badges on or off on page 43.

Other new features

- Feel more secure when installing apps from sources other than the Google Play Store. Granting permission for downloading and installing apps from unknown sources is now on a per app basis. See Downloading apps from the web on page 127.

- Looking for a setting option but can’t remember where it is? The Settings screen’s search feature helps you find it even if it’s buried deep in one of the categories. Tap 🔍 and then type the first few letters of the option you’re looking for. Once the option is shown in the results, tap it to go to its screen.

- There’s a built-in file manager app that currently lets you do simple things with your media files, such as copy, move, and delete. From the Home screen, swipe up and then find and tap Files.
What’s special with Camera

Capture great photos and videos using HTC U11 life.

HDR Boost

Take clearer, sharper photos using HDR Boost. By combining multiple shots with different exposure levels, HDR Boost lets you capture great photos even in low light conditions. See Using HDR Boost on page 77.

Pro level capabilities

Pro mode gives you professional level control over your photography. See Manually adjusting camera settings on page 82. Capture RAW photos and take full control over your camera settings. See Taking a RAW photo on page 83.

The camera captures RAW photos in DNG format. The RAW file provides more image information for post processing in the Google Photos™ app or a graphics program on your computer.

Hyperlapse

Hyperlapse lets you speed up the action up to 12 times, and select sections of the video to change its speed. See Recording a Hyperlapse video on page 81.

Selfies

Capture awesome selfies with the front facing camera.

See Selfies on page 74.

- Live Makeup – Before taking your selfie, use Live Makeup to smoothen your skin. See Applying skin touch-ups with Live Makeup on page 74.
- Instant selfie shots – Flash a smile, and the camera instantly captures your smiling face. Or, just say “Cheese!” See Taking selfies automatically on page 75 and Taking selfies with voice commands on page 75.
- Enjoy taking wide-angle selfies with family or friends and with a panoramic scenery behind you. See Taking a panoramic selfie on page 77.
Immersive sound

Discover audio bliss on HTC U11 life through its earphones and speakers.

HTC USonic with Active Noise Cancellation

Experience music tuned to your ears. When you plug in the HTC USonic earphones to HTC U11 life, they will scan your ears and determine the audio output level that best suits you. The earphones also incorporate Active Noise Cancellation which reduces background noise so you hear music and videos clearly.

See Tuning your HTC USonic earphones on page 69 for details.

The HTC USonic earphones can only be used with HTC U11 life and other compatible HTC phones supporting HTC USonic.

Record audio in high res quality

Enable high res quality audio in Voice Recorder to make crystal clear audio recordings. See Enabling high resolution audio recording on page 136 for details.

Truly personal

Designed with you in mind, HTC U11 life is filled with innovations that help it to adapt to your life.

Themes

Make HTC U11 life more personal by customizing how it looks with your own photos and then mix and match with different sets of icons, sounds, color schemes, and more.

More wallpaper types, such as Multiple wallpapers and Apps screen wallpapers, are also in store!

Freestyle home screen

If you want to take designing your Home screen to the next level, try the Freestyle home screen layout for zero-grid limitations and fun stickers to replace your app icons.
HTC BlinkFeed

Get your favorite topics, news, social media, and more conveniently delivered to one place on your phone. Even get suggestions for places to eat! You can also play embedded videos right on HTC BlinkFeed®. See http://www.htc.com/support/apps/blinkfeed/.
Unboxing and setup

HTC U11 life overview

After taking HTC U11 life out of the box, familiarize yourself first with the location of the card tray and the different button controls.

1. POWER
2. VOLUME buttons
3. Proximity sensor
4. Front camera
5. Notification LED
6. Microphone
7. nano SIM and storage card tray
8. Edge Sense squeeze area
9. BACK
10. HOME / Fingerprint scanner
11. Speaker
12. RECENT APPS
13. USB Type-C™ connector

You need a 4G/LTE™ plan to use your operator’s 4G/LTE network for voice calls and data services. Check with your operator for details.
Before use, check all the items in the box and make sure there's no damage to any of the items.

Use the case if it's provided in the box or purchase one that's designed for HTC U11 life to help protect your phone from accidental bumps and scratches. Also make sure the case doesn't block the Edge Sense area.

If you want to use a screen protector, don't cover and block the proximity and light sensor. Purchase a screen protector designed for HTC U11 life.

Don't disassemble any part of the phone. Don't try to open the phone or remove the battery by force. This may damage the phone or its electronics and will invalidate the warranty.

Please read the safety and usage guidelines in the Safety and regulatory guide that's included in the box.

---

**Back panel**

1. Main camera with BSI and PDAF
2. LED flash

---

**Card tray**

When inserting the eject tool into the tray eject hole to remove the card tray, do not obstruct the tray to avoid damaging the eject mechanism inside the slot.

- BSI means BackSide Illumination sensor.
- PDAF means Phase Detection Auto Focus.
nano SIM card

Use a standard nano SIM card. A modified card that is thicker than the standard nano SIM card will not fit properly on the tray and may damage the card slot.

Inserting the nano SIM card

1. Hold the phone face up.
2. Insert the tip of the tray eject tool that came with your phone—or a small bent paperclip—into the tray eject hole.

Do not insert the tip of the tray eject tool into the microphone hole. This may damage the water-resistant microphone mesh and invalidate the warranty.
3. Push the tip all the way into the hole until the tray ejects, and then pull the tray out.

4. Do the following to place your nano SIM card into the tray:

   With your nano SIM card’s gold contacts facing down, place the card into the SIM holder of the tray. Make sure to align the cutoff corner to the notch on the holder.

   ![SIM card placement diagram]

   Place your microSD™ card into the SD holder of the tray. See Inserting the microSD card on page 22.

5. When reinserting the tray, make sure it is facing up so that your cards don’t fall out. Hold the tray with the outer card holder between your fingers, and then steadily slide the tray all the way into the slot.

   ![Reinserting tray diagram]

6. Make sure the tray is fully inserted and doesn’t protrude from the slot.
Removing the nano SIM card

1. Hold the phone face up.
2. Insert the tip of the tray eject tool or a small bent paperclip into the tray eject hole.

Do not insert the tip of the tray eject tool into the microphone hole. This may damage the water-resistant microphone mesh and invalidate the warranty.

3. Push the tip all the way into the hole until the card tray ejects.
4. Pull the tray out, and then remove the nano SIM card.
5. To reinsert the tray, center it first in the slot, and then slide it all the way in.
6. Make sure the tray is fully inserted and doesn’t protrude from the slot.

Storage card

Use a storage card to store your photos, videos, and music. When you need to free up phone storage space, you can also move certain apps to the storage card, if the apps support this feature.

The storage card is optional and sold separately.
Inserting the microSD card

1. Hold the phone face up.

2. Insert the tip of the tray eject tool that came with your phone—or a small bent paperclip—into the tray eject hole.

Do not insert the tip of the tray eject tool into the microphone hole. This may damage the water-resistant microphone mesh and invalidate the warranty.

3. Push the tip all the way into the hole until the tray ejects, and then pull the tray out.

4. Place your microSD card—gold contacts facing down and narrow side facing in—into the SD holder of the tray.
5. When reinserting the tray, make sure it is facing up so that the nano SIM and microSD cards don’t fall out. Hold the tray with the outer card holder between your fingers, and then steadily slide the tray all the way into the slot.

![Image of reinserting the tray](image)

6. Make sure the tray is fully inserted and doesn’t protrude from the slot.

If it’s the first time you insert a microSD card, you’ll be prompted to set it up.

---

**Unmounting the storage card**

When you need to remove the storage card while HTC U11 life is on, unmount the storage card first to prevent corrupting or damaging the files in the storage card.

- If your storage card is used as internal storage and there are apps that were moved to the card, you will not be able to open these apps after unmounting the card.

1. From the Home screen, swipe up and then tap **Settings > Storage**.
2. Do one of the following:
   - If your storage card appears under Portable storage, tap 🕌 > Eject.
   - If your storage card appears under Device storage, tap the card name, and then tap ⌁ > Eject.
Removing the microSD card

Make sure to unmount your microSD card before removing it. See Unmounting the storage card on page 23.

1. Hold the phone face up.

2. Insert the tip of the tray eject tool that came with your phone—or a small bent paperclip—into the tray eject hole.

3. Push the tip all the way into the hole until the tray ejects.

4. Pull the tray out, and remove the microSD card.

5. To reinsert the tray, center it first in the slot, and then slide it all the way in.

6. Make sure the tray is fully inserted and doesn’t protrude from the slot.

Do not insert the tip of the tray eject tool into the microphone hole. This may damage the water-resistant microphone mesh and invalidate the warranty.
Charging the battery

Before you turn on and start using HTC U11 life, it is recommended that you charge the battery.

- If the battery has been discharged for several days, you may need to charge HTC U11 life for several minutes before powering it on.
- Use only the adapter and the USB Type-C cable that came with HTC U11 life to charge the battery. When the battery power is too low, make sure to use the power adapter to charge, not the USB cable connection with your computer.

1. Insert the small end of the USB Type-C cable into the USB Type-C connector.

2. Insert the other end of the USB Type-C cable into the power adapter.

3. Plug in the power adapter to an electrical outlet to start charging the battery.

- As a safety precaution, the battery may stop charging to avoid overheating.
- Avoid charging the battery in hot environments.
- When you’re using the web browser and charging the battery, HTC U11 life may become warmer. This is normal.
- To conserve energy, unplug the power adapter from the electrical outlet after you finish charging.

Water and dust resistant

HTC U11 life is water and dust resistant and has an IP67 rating as defined in the International Standard IEC 60529. With the nano SIM/microSD slot covered and closed tightly, this phone is water resistant if it is briefly submerged by accident in fresh water less than 1 meter deep and no longer than 30 minutes at room temperature.

HTC U11 life must not be exposed to non-fresh water, high water pressure, strong or fast-moving water, or sand since these may cause overheating, electric shock, or damage to the phone. Do not attempt to charge or otherwise use the USB port when HTC U11 life is wet. Normal wear and tear may decrease the water and dust resistance over time.

Warranty will be void if the phone is not used in accordance with the instructions and precautions addressed in this user guide, including, but not limited to, using the phone in environments or
situations that exceed the limitations of the IP67 rating. For usage precautions and tips on care and maintenance, see Care and maintenance tips on page 26 and Cleaning and drying on page 27. Also make sure to read the Safety guide that comes with the phone.

---

### Care and maintenance tips

Follow these tips and precautions to help maintain water and dust resistance for your phone.

Never attempt to insert or remove the nano SIM and microSD cards with gloves, wet hands, or when the phone is wet.

- Before inserting the tray and closing the card slot, wipe off every drop of water or dirt with a clean, dry cloth. Also make sure that no hairs, fibers, or small particles are caught between the tray and the slot opening to prevent water from entering the phone.

- Parts that maintain water resistance such as the tray—which acts as the card slot cover—may degrade over time. If these parts degrade or get damaged, the phone will no longer be water resistant. If this happens, contact your retail store or mobile operator. You may be charged for parts replacement.

Do not intentionally submerge HTC U11 life. If the phone accidentally gets immersed in water, avoid pressing the controls—such as the POWER and VOLUME buttons—and do not operate the phone.

Do not expose the phone to fast or strong-moving water such as shower spray, running taps or faucets, waterfalls, or ocean waves.

Do not expose the phone to or let the USB port come in contact with the following:

- Water containing soap, detergent, or shower gel
- Sea water, swimming pools, spas, hot water, and hot springs
- Any liquid besides tap water such as alcohol, juices, and condiments
- Sand

If the phone is exposed to fresh water, make sure to dry it thoroughly. To avoid damaging the phone, do not charge when contaminants are present or the USB port is not completely dry. In these circumstances, do not connect any external device.

Never use a hair dryer to dry wet parts of the phone.

The power adapter and accessories are not water resistant. Never use them in wet areas such as in the bathroom or kitchen since contact with water may cause malfunction, electric shock, or other hazards.

Avoid leaving the phone in humid places such as the bathroom or kitchen for too long since it is not moisture-proof.
Cleaning and drying

If HTC U11 life has had contact with salt water, liquid chemicals, dust, or other contaminants, immediately rinse the phone. When the phone is wet, make sure to dry it thoroughly.

- To avoid damaging HTC U11 life, do not charge the phone when contaminants are present or the USB port is not completely dry. In these circumstances, do not connect any external device.
- The sound volume of the earpiece, speakers, and microphone may be less audible if these parts are not dried well.

Rinsing

1. Before rinsing, make sure the nano SIM/microSD slot is covered and closed tightly. See nano SIM card on page 19 and Storage card on page 21.
2. Rinse the phone using fresh water. Rinse by hand only. Don’t use a brush or sponge.
   While rinsing, do not press on the tray to avoid having gaps around the card slot which may allow water to enter the phone.

Drying

1. Gently wipe off the water from the phone with a clean, dry cloth. Don’t use cotton swabs to wipe the earpiece, speakers, microphone, and connection port.
2. The display may not respond accurately to touch gestures when it’s wet. For the touch screen and lenses, wipe with a soft dry cloth such as a microfiber cloth that will not scratch the surface.
3. Leave the phone at room temperature for 3 hours or so to let it dry completely. If buttons and any connection port such as the USB port are still wet, make sure to let them dry completely before you use the phone.

If condensation forms inside the display such as when there’s a drastic change in temperature, place the phone at room temperature until condensation disappears.

Switching the power on or off

Switching the power on

Press the POWER button until HTC U11 life vibrates.

When you turn on HTC U11 life for the first time, you’ll need to set it up.
Switching the power off

1. If the display is off, press the POWER button to turn it back on.
2. Press and hold the POWER button for a few seconds.
3. Tap **Power off** on the options menu.

Setting up HTC U11 life for the first time

When you switch on HTC U11 life for the first time—or after you've done a factory reset—you’ll need to set it up.

If you have data from a previous HTC phone that you need to copy, first back up the phone’s data before you start setting up HTC U11 life. For guidance, go to [htc.com/support](http://htc.com/support) and then click **Backup and Transfer**.

1. If you need to navigate by voice feedback, turn on TalkBack by pressing and holding two fingers on the first screen until you hear a message and then a beep.
   Or if you accidentally enabled TalkBack, follow the onscreen tutorial to turn it off.
2. Choose the system language you want to use, read and agree to the terms of use, choose your Internet connection, and sign in to your Google® Account.
3. On the screen that asks you which device to restore from, do one of the following:
   - If you backed up your old phone using your Google Account, tap the phone name. Tap **✓** to select the apps to install, and then tap **Restore**.
   - If you want to start fresh, tap **Don’t restore**.
4. On the Google services screen, make sure the **Back up to Google Drive** option is turned on to automatically back up HTC U11 life. It’s also recommended to have the options under Location and Device maintenance turned on.
5. Set up Google Assistant, or do this later. For details, visit [support.google.com/assistant/](http://support.google.com/assistant/).
6. Sign in to your HTC Account to use the same login credentials for HTC services such as Themes and HTC Sense Companion.
7. Set up Edge Sense so you can instantly take camera shots or perform other actions by simply squeezing your phone. See What is Edge Sense? on page 50 for details.
8. Tap **Set up fingerprint** to add your fingerprint and use it for unlocking your phone. See [Fingerprint scanner](#) on page 29 for details.
9. Follow the remaining instructions to finish your phone setup.
Adding your social networks, email accounts, and more

You can sync contacts, calendars, and other information from your social networks, email accounts, and online services on HTC U11 life. Depending on the account type, signing in to your online accounts lets you sync updates between HTC U11 life and the Web.

1. From the Home screen, swipe up and then tap **Settings > Accounts & sync**.
2. Tap **Add account**.
3. Tap the account type you want to add.
4. Follow the onscreen instructions to enter your account information.

You can add several Google Accounts.

Syncing your accounts

1. From the Home screen, swipe up and then tap **Settings > Accounts & sync**.
2. Tap the **Automatically sync data On/Off** switch to turn automatic sync of all your accounts on or off.
3. To manually sync individual accounts, tap an account, tap **Account sync**, and then tap **Sync now**.

On the Account sync screen, you can also change the sync settings for your Google Account.

Removing an account

Remove accounts from HTC U11 life if you no longer use them. Removing an account does not remove accounts and information from the online service itself.

1. From the Home screen, swipe up and then tap **Settings > Accounts & sync**.
2. Tap an account.
3. Tap **Remove Account**.

Some personal data may be retained by the third-party app after you have removed the account from HTC U11 life.

Fingerprint scanner

You can quickly wake up and unlock the HTC U11 life using your fingerprint. You can add up to 5 fingerprints.

When setting up and using the fingerprint scanner, follow these tips:
- Make sure your finger and the fingerprint scanner are dry and clean.
- Use the entire pad of your finger, including the sides and tip.
- When recording your fingerprint, touch the scanner until it vibrates.
- The fingerprint scanner has 360° readability—you can touch a recorded finger at any angle to the scanner to turn on the screen or unlock the HTC U11 life.

You may not be able to set the fingerprint scanner to unlock HTC U11 life, if you've signed in to an Exchange ActiveSync® account that requires you to set a different screen lock option (such as password). Check with your Exchange Server administrator if your Exchange ActiveSync account supports the fingerprint scanner.

Adding a fingerprint the first time

1. From the Home screen, swipe up and then find and tap Settings > Fingerprint scanner.
2. Tap Add fingerprint.

   If you haven’t already set up a screen lock, you’ll be asked to choose and set up a backup pattern, PIN, or password for unlocking your phone. See Setting a screen lock on page 156.
3. If prompted, choose how you want to show notification content when your phone is locked, and then tap Done.
4. Touch the fingerprint scanner or tap Start.
5. Place the finger you want to use on the scanner until it vibrates, then lift your finger.
6. Repeatedly touch the scanner until the fingerprint has been successfully recorded. You’ll get the best results if you hold your finger in the same direction when touching the scanner.
7. After you’ve successfully recorded your fingerprint, tap Done.

You can now use your fingerprint to wake up and unlock your phone.

You’ll need to input your backup lock screen pattern, PIN, or password if the scanner doesn’t identify your fingerprint after five attempts. You’ll only have 10 additional attempts before your data is deleted from the phone.

Fingerprint scanner settings

There are certain things you can do with the fingerprint scanner with or without your fingerprint added. You can turn these features on or off in Settings.

1. From the Home screen, swipe up and then find and tap Settings > Fingerprint scanner.
2. Enter your pattern, PIN, or password.
3. When you touch the fingerprint scanner, below are features that would work even without your fingerprint added. You can turn these features on or off:

- **Wake up screen**: Wakes up to the lock screen.
- **Tap to take a selfie**: Captures selfies while you’re using the Selfie Photo or Selfie Video mode in the HTC Camera app. This feature is available only in phones that have the fingerprint scanner at the back panel.

4. To manage your fingerprints:

- Tap **Add fingerprint** to add one or more fingerprints that you can use for unlocking your phone.
- Select or clear **Vibrate on scan**, depending on whether you like to have vibration feedback when touching the fingerprint scanner.
- Tap a recorded fingerprint to rename or delete it.
- Tap **Reset fingerprint scanner** to delete all recorded fingerprints.
Your first week with your new phone

HTC Sense Home

After you've turned on and set up HTC U11 life for the first time, you'll see the Home screen.

- Swipe right and you’ll find HTC BlinkFeed. You can customize HTC BlinkFeed to show posts from your social networks, headlines from your favorite news media, and more. For details, see http://www.htc.com/support/apps/blinkfeed/.

- Swipe left and you'll discover space for adding your favorite widgets, apps, and more so they’re just a tap away. You can also add panels. For details, see Adding or removing a widget panel on page 63.

- You can change the apps on the launch bar at the bottom of the Home screen. See Launch bar on page 65.

💡 While you’re in another screen or app, press HOME to return to the last Home screen you visited.

Sleep mode

Sleep mode saves battery power by putting HTC U11 life into a low power state while the display is off. It also stops accidental button presses when HTC U11 life is in your bag.

Switching to Sleep mode

To turn off the display and switch to Sleep mode, briefly press the POWER button. You can also double-tap the lock screen.

HTC U11 life also automatically goes into Sleep mode when it's left idle for a while. You can change the time before HTC U11 life sleeps by setting the screen timeout. For details, see Setting when to turn off the screen on page 151.

Waking up from Sleep mode

- Press the POWER button.

- Use Motion Launch to wake up and unlock your phone directly to an app or screen. See Motion Launch on page 43.
Lock screen

- Swipe up on the lock screen to unlock the screen. Or, press and hold the fingerprint sensor.
- Tap twice on a notification to go directly to the related app.
- Swipe left or right on the notification to remove it.
- Press and hold a notification to mute or block notifications from the related app. Tap More settings to customize the notification settings.

If you don’t want notification content to appear on the lock screen, go to Settings > Sound & notification > On the lock screen, and then tap Don’t show notifications at all.

- If you want to set up a screen lock or Smart lock, see Setting a screen lock on page 156 for details.

Motion gestures

Use motion gestures to mute HTC U11 life, lower the ring volume, and more.

Lift phone to auto answer a call

To automatically answer an incoming call, lift the phone and look at the screen first to see who’s calling before you hold it to your ear.

You can turn this feature on or off. In Settings > Call, select or clear Auto answer calls.

Flip to mute

If your phone is facing up when a call comes in, turn the phone over to mute it.

Go to Settings and then tap Sound or Sound & notification. Tap Advanced > Flip to mute, and you can set your phone to:

<table>
<thead>
<tr>
<th>Mute once</th>
<th>Mute only once after flipping the phone. While the phone is still facing down, it will ring again when there are other incoming calls.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mute always</td>
<td>After flipping the phone to mute a call, keep it always muted while it’s still facing down when there are other incoming calls.</td>
</tr>
</tbody>
</table>
Pick up to lower volume

In a business meeting or restaurant, pick HTC U11 life up when a call comes in to lower the ring volume automatically.

You can turn this feature on or off. Go to Settings, tap Sound or Sound & notification. Tap Advanced, and then tap the Quiet ring on pickup On/Off switch.

Increase ring volume automatically while phone is in your pocket or bag

Pocket mode makes HTC U11 life recognize when your phone is in your bag or pocket and raise the ring volume so that you can hear it in noisy environments.

You can turn this feature on or off. Go to Settings, tap Sound or Sound & notification. Tap Advanced, and then tap Pocket mode On/Off switch.

Rotate HTC U11 life for a better view

For many screens, you can automatically change the screen orientation from portrait to landscape by turning HTC U11 life sideways.

When entering text, you can turn HTC U11 life sideways to bring up a bigger keyboard.
Touch gestures

Use touch gestures to get around the Home screen, open apps, scroll through lists, and more.

**Tap**

Tap the screen with your finger when you want to select onscreen items such as application and settings icons, or press onscreen buttons.

**Press and hold**

To open the available options for an item (for example, a contact or link in a webpage), just press and hold the item.

**Swipe or slide**

Quickly swipe your finger horizontally across the screen to go to other Home screen panels. Swipe vertically to scroll through a list, document, and more.
Drag

Press and hold your finger with some pressure before you start to drag. While dragging, don’t release your finger until you have reached the target position.

Flick

Flicking the screen is similar to swiping, except that you need to swipe your finger in light, quicker strokes, such as when moving right and left on the Home screen, or flicking through a contacts or message list.

Press and flick

On the Home screen, you can easily move a widget or icon from one screen to another.

Press and hold the widget or icon with one finger, and flick the screen to the new location with another finger.
Slide with two fingers

In some apps, slide two fingers apart to zoom in when viewing a picture or text.

Slide two fingers together to zoom out of the picture or text.

Two-finger swipe

Swipe down from the status bar using two fingers to access Quick Settings.
Three-finger swipe

- Swipe up the screen with three fingers and HTC Connect® streams music or video from HTC U11 life to your speakers or TV respectively. You can also share streaming media from apps such as YouTube®.
- Swipe down to disconnect from your speakers or TV.

**Media gesture** is turned on in Settings by default, which makes the three-finger gesture work for sharing media.

Getting to know your settings

Want to change the ringtone, set up a Wi-Fi® connection, or add your accounts? Do this and more in Settings.

1. Open Settings from the Apps screen or Notifications panel:
   - From the Home screen, swipe up and then find and tap Settings.
   - From the Home screen, tap  , and then find and tap Settings.
   - Swipe down from the top of the screen and then tap  .

2. Here are some of the basic settings you can change:
   - Tap the On/Off switch next to an item such as Wi-Fi to turn it on or off. Tap the item itself to configure its settings.
   - Tap Display, gestures & buttons to change the wallpaper, adjust the font and display size, set a screen saver, and more.
   - Tap Sound & notification to change the ringtone, decide if sound and vibration occur when interacting with the phone, set Do not disturb preferences, and more.
   - Tap Security to help secure your phone, set a screen lock, choose lock screen preferences, and more.
   - Tap an item under Suggestions to check out new or recommended settings to customize.

**Tap  in Settings to quickly find options and settings.**
Using Quick Settings

In the Quick Settings panel, easily turn settings such as Wi-Fi and Bluetooth® on or off.

1. Swipe down from the top of the screen to open the Notifications panel.
   Right below the status bar, you'll see the short Quick Settings bar.

2. To see the full Quick Settings panel, do any of the following:
   - On the lock screen, swipe down once from the top of the screen.
   - On any other screen, swipe down once with two fingers or swipe down twice with one
     finger from the status bar.
   - With the short Quick Settings bar opened, tap

3. Swipe left or right to see more tiles.
4. To turn a setting on or off, just tap its tile.

Customizing Quick Settings

You can remove, replace, or rearrange the tiles in Quick Settings.

1. With two fingers, swipe down from the top of the screen to open Quick Settings.

2. Tap and do one of the following:
   - Press and hold a tile, and then drag it to your desired position.
   - Press and hold a tile, and then drag it down under the Drag to add tiles section to hide it
     from the Quick Settings panel.
   - Under the Drag to add tiles section, drag a tile up to show it in the Quick Settings panel.

3. Press .

There is a limit to the number of tiles that can be shown in the first panel of Quick Settings. You
may need to swipe left on the Quick Settings panel to see more Quick Settings tiles.
Capturing your phone’s screen

Want to show off your high game score or write a blog post about HTC U11 life features? It’s easy to take a picture of the screen to share.

1. Press and hold POWER and VOLUME DOWN at the same time.
2. Open the Notifications panel, and then slide two fingers apart on the Screenshot captured notification.
3. Tap Share.

Travel mode

Do you often travel across time zones? Turn on Travel mode in Settings to see a dual clock on the Home screen and lock screen that shows both your home and current time zones.

- Make sure you turn on location services in your phone settings.
- Set your home time zone first in the Clock app.

1. From the Home screen, swipe up and then tap Settings > Date & time.
2. Tap the Travel mode On/Off switch to turn travel mode on or off.

You’ll see a dual clock of your home and current locations once your phone detects a different time zone from the home time zone you’ve set.

Restarting HTC U11 life (Soft reset)

If HTC U11 life is running slower than normal, is unresponsive, or has an app that is not performing properly, try rebooting and see if that helps solve the problem.

1. If the display is off, press the POWER button to turn it back on.
2. Press and hold the POWER button, and then tap Restart.
HTC U11 life not responding?

If HTC U11 life does not respond when you touch the screen or press the buttons, you can still restart it.

Press and hold the POWER and VOLUME DOWN until your phone vibrates, and then release the buttons.

💡 You may need to press and hold the buttons for 12 to 15 seconds before the phone vibrates.

Notifications

Notification LED

The notification LED shows a:

- Solid green light when HTC U11 life is connected to the power adapter or a computer and the battery is fully charged.
- Flashing green light when you have a pending notification.
- Solid orange light when the battery is being charged.
- Flashing orange light when the battery level reaches very low.

Choosing when to flash the notification LED

You can change when to flash and which apps will flash the LED when there are new notifications.

1. From the Home screen, swipe up and then tap Settings > Sound & notification.
2. Tap Advanced.
3. Under Notifications, tap Flash LED for notifications. Choose whether to always flash the LED or flash it only when the screen is off.

💡 In other apps, check their settings to find out if they have an option for flashing the LED.
**Notifications panel**

Notification icons inform you of new messages, calendar events, alarms, and activities in progress such as files downloading.

When you see notification icons, open the Notifications panel to check out details of the notifications that you’ve received.

To open the Notifications panel, slide down from the top of the screen.

Or just swipe down anywhere on the Home screen.

- Tap the notification to open the corresponding app.
- To dismiss just one notification in the list, drag it left or right.
- Slide two fingers apart on the notification to expand it and see more details or see if there are more notifications bundled inside it. Slide two fingers together on the notification to minimize it again.
- Some notifications allow you to take immediate action. For example, tap a missed call notification to return the call or reply with a text message.
- If you have several notifications, scroll through the list screen to see them all.
- To dismiss all non-persistent notifications, tap **Clear all**.
- You can change what app notifications you want to receive and also snooze some notifications to temporarily remove them. See **Managing app notifications** on page 42.

**Managing app notifications**

You can choose which types of app notifications to mute, block, or override your Do Not disturb settings.

1. From the Home screen, swipe up and then tap **Settings > Sound & notification**.
2. Tap **Advanced**.
3. Under Notifications, tap **Notification**, and then tap the app whose notifications you want to customize.

   You can also press and hold a notification in the Notifications panel or the lock screen to see the notification settings you can customize.

4. Tap the **On/Off** switch next to option you want to toggle.

Settings for app notifications are applied to notifications in the Notifications panel and the lock screen.

**Snoozing notifications**

You can snooze notifications to temporarily remove them from the status bar and notifications panel.

1. Swipe down from the top of the screen to open the Notifications panel.
2. Slide the notification slowly to the right or left, and then tap ⏯️.
3. Tap ⬇️ then choose how long you want to snooze the notification.

The snoozed notification shows up again on the status bar and notifications panel as soon as the snooze time ends.

**Turning icon badges on or off**

Some apps may show a dot when they have notifications, You can choose to show or hide the dot on the app icons.

1. From the Home screen, swipe up and then tap **Settings** > **Sound & notification**.
2. Tap **Advanced**.
3. Under Notifications, tap **Notifications**, and then tap the app you want to customize.
4. Tap the **On/Off** switch next to the **Allow icon badge** option to turn it on or off.

**Motion Launch**

Motion Launch is a combination of a motion gesture followed by a finger gesture. Using a combination of simple gestures, you can wake up to your Home screen, HTC BlinkFeed, and more.

See the following:

- [Waking up to the lock screen](#) on page 44
- [Waking up and unlocking](#) on page 44
- [Waking up to the Home widget panel](#) on page 45
- [Waking up to HTC BlinkFeed](#) on page 45
- [Launching the camera](#) on page 46
Turning Motion Launch gestures on or off

1. From the Home screen, swipe up and then tap Settings > Display, gestures & buttons.
2. Tap Motion Launch gestures.
3. Select the Motion Launch gestures you want.

Waking up to the lock screen

Go from sleep mode to the lock screen without pressing the POWER button.

If you’ve set up a screen lock with credentials, you’ll be asked to provide your credentials first before HTC U11 life unlocks.

1. Lift the phone in portrait orientation.
2. Immediately double-tap the screen.

Waking up and unlocking

Go from sleep mode and unlock HTC U11 life to the last screen you were using without pressing the POWER button.

If you’ve set up a screen lock with credentials, you’ll be asked to provide your credentials first before HTC U11 life unlocks.

1. Lift the phone in portrait orientation.
2. Immediately swipe up from the bottom half of the screen.
Waking up to the Home widget panel

Go from sleep mode to the Home widget panel without pressing the POWER button.

If you’ve set up a screen lock with credentials, you’ll be asked to provide your credentials first before HTC U11 life unlocks.

1. Lift the phone in portrait orientation.
2. Immediately swipe left from the right side of the screen.

Waking up to HTC BlinkFeed

Go from sleep mode to HTC BlinkFeed without pressing the POWER button.

If you’ve set up a screen lock with credentials, you’ll be asked to provide your credentials first before HTC U11 life unlocks.

1. Lift the phone in portrait orientation.
2. Immediately swipe right from the left side of the screen.
Launching the camera

Go from sleep mode to the Camera app without pressing the POWER button.

1. Lift the phone in portrait orientation.
2. Immediately swipe down twice on the screen.

If you've set up a screen lock with credentials, you'll be asked to provide your credentials when you exit the Camera app.

Selecting, copying, and pasting text

1. Press and hold on a word.
2. Drag the start and end anchors to highlight the text you want to select.
3. Tap Copy.
4. In a text entry field (for example, while composing an email), press and hold at the point where you want to paste the text.
5. Tap Paste.

Sharing text

1. After you have selected the text, tap Share.
2. Choose where to share the selected text.

Entering text

The keyboard becomes available when you tap a text field in an app.

- Tap the keys on the onscreen keyboard to enter letters and numbers, as well as punctuation marks and symbols.
- Tap ⇡ to enter an uppercase letter. Tap twice to turn on caps lock.
- Press and hold keys with gray characters at the top or bottom to enter numbers, symbols, or accented letters. Some keys have multiple characters or accents associated with them.
• Tap 12# to show number and symbol keys. Tap abc to return to the main keyboard.

• Tap 😊 to choose from a wide selection of emojis.

• Tap 🌐 to check out more features, options, and settings. You can resize the keyboard space, change the layout and design, download dictionaries, and more.

• Press ☐ to close the onscreen keyboard.

Entering text by speaking

1. Tap an area where you want to enter text.

2. On the onscreen keyboard, press and hold 📱.

3. When you see the microphone button and the words “Speak now”, say the words you want to enter.

4. Enter punctuation marks by saying the name. For example, say “comma”.

Enabling smart keyboard options

Turn on the keyboard’s advanced features to help you type faster, such as contextual prediction, auto-correction, and more.

1. From the Home screen, swipe up and then tap Settings > Language & keyboard.

2. Tap Virtual keyboard > TouchPal - HTC Sense Version > Smart input.

3. Select the options to enable.

How can I type faster?

The onscreen keyboard of your phone is highly customizable. You can modify its settings and options to enhance your typing experience.

Here are some tips that you could try:

• **Show the numeric keys on the top row of the keyboard.** Go to Settings, and then tap Language & keyboard. Tap Virtual keyboard > TouchPal - HTC Sense Version > General settings. Select Number Row.

• **Turn on Contextual prediction.** Go to Settings, and then tap Language & keyboard. Tap Virtual keyboard > TouchPal - HTC Sense Version > Smart input, and then make sure that Contextual prediction is selected. This option enables next word prediction and will also allow the keyboard to learn from the usual word patterns you type for better word suggestions.
- **Switch to landscape mode.** With two fingers, swipe down from the status bar and check if **Auto rotate** is turned on. Open the app you need, and then tap a text field to show the keyboard. Turn your phone sideways to bring up a bigger keyboard.

  You can then tap 🎁 > **Split.**

  ![Keyboard Split](image)

- **Resize or reposition the keyboard.**

  Open the app you need, and then tap a text field to show the keyboard. Tap 🎁, and then tap **Resize.** Drag any of the border arrows to resize your keyboard.

  ![Keyboard Resize](image)

  To move the keyboard up, drag the center button up.
Getting help and troubleshooting

Want some quick guidance on your phone?

Check out the friendly walkthroughs and the FAQs in the Help app to learn how to use your phone.

- When you see a Help tile in HTC BlinkFeed, just tap the tile to know more about the tip.
- From the Home screen, tap 📢, and then find and tap Help.

You can then tap Search help articles & videos, and enter what you’re looking for. Or you can tap ≡ to browse how-tos, FAQs, and more.

If HTC Help is not preinstalled on your phone, you can download it from Google Play Store.

Having hardware or connection problems?

Before calling for support, you can first use the Help app to troubleshoot or perform diagnostics on your phone. This helps you in finding the problem cause, and in determining whether you can resolve the problem or you need to call for support.

1. From the Home screen, tap 📢, and then find and tap Help.
2. On the Help screen, tap ≡ and then tap Troubleshooting or Diagnostics tools to use a troubleshooting wizard to check the basic hardware functions.
3. You can also tap Software updates to check for new software updates if available. Software updates may contain bug fixes and feature improvements.
Edge Sense

What is Edge Sense?

- The help content here is based on the following app version: 1.21.9x.
- Download the latest version of HTC Edge Sense from Google Play Store to enjoy add-on features.

Edge Sense provides an intuitive way to interact with your HTC phone by simply squeezing its lower sides. Customize Edge Sense to quickly launch your favorite app or do certain actions.

Here are the actions that currently can be assigned to the squeeze gestures in Edge Sense:

- Launch the HTC Camera app—which is assigned to the short squeeze gesture by default. See Taking camera shots using Edge Sense on page 52.
- Launch the default voice assistant—which is assigned to the squeeze and hold gesture by default. See Typing with your voice with Edge Sense on page 54.
  
  You can also switch to another voice assistant app if you downloaded one from Google Play Store. See Assigning another voice assistant app to Edge Sense on page 54.
- Launch HTC Alexa. This app is currently available on phones sold in the U.S., U.K., and Germany only.
- Launch the default music app. Play or pause with a short squeeze when music is playing in the background.
- Launch HTC Sense Companion.
- Launch any other app that's preinstalled or downloaded on your phone.
- Capture screenshots.
- Turn the flashlight on or off.
- Start or stop voice recording. You need to have the HTC Voice Recorder app.
- Turn Wi-Fi Hotspot on or off.
- Expand or collapse the Notifications panel.

In addition to the above, you can customize squeeze gestures to perform certain actions in an app. See Assigning in-app actions to squeeze gestures on page 56.
Except for capturing screenshots and performing in-app actions, the above can be triggered by squeeze gestures even when the screen is off.

Play Music and third-party music apps that follow the Android music control standard are supported by Edge Sense.

Setting up Edge Sense

If you didn’t set up Edge Sense when you first set up your phone, you can do it in Settings.

1. From the Home screen, swipe up and then tap Settings Edge Sense.
   The Edge Sense setup screen will also appear automatically when you squeeze the lower sides of your phone the first time.

2. Follow the onscreen instructions to complete the process.

After you’ve finished setting up Edge Sense, it works in Basic mode which, by default, allows you to launch the Camera app and take shots with a squeeze of your phone. See Taking camera shots using Edge Sense on page 52. If you want to assign another action or app to the squeeze gesture, see Changing the action to take when you squeeze the phone on page 52.

Edge Sense also has an Advanced mode that gives you two types of squeeze gestures: a short squeeze and a squeeze and hold. For details, see Enabling Advanced mode on page 53.

Turning Edge Sense on or off

You can turn Edge Sense on or off in Settings.

1. Go to Settings.

2. Tap the Edge Sense On/Off switch to turn it on or off.

You can also turn Edge Sense on or off in Quick Settings.
Taking camera shots using Edge Sense

Instantly launch the camera and begin taking shots with a squeeze of your phone.

Check and make sure to download the latest HTC Edge Sense and Camera app versions from Google Play Store.

Squeeze the lower sides of your HTC phone to open the Camera app, and then squeeze again to take a photo.

Squeezing your phone will open the Camera app in the last capture mode you were using. When you squeeze again, the camera takes a photo, video, or selfie, depending on the capture mode.

If you turn on Advanced mode in the Edge Sense settings, you can squeeze and hold the lower sides of your phone to switch between the main and front cameras while you’re in the Camera app. For details, see Enabling Advanced mode on page 53.

The default in-app actions in the Camera app are short squeeze for taking shots and squeeze and hold for switching between the front and main cameras. You can change the squeeze gestures to perform other actions in an app. To find out how, see Changing in-app actions on page 57.

Changing the action to take when you squeeze the phone

By default, the Camera app opens when you squeeze your phone. You can assign the squeeze gesture to do a different action or launch a different app.

1. From the Home screen, swipe up and then tap Settings > Edge Sense.
2. Tap Customize squeeze action, and then choose your preferred option.
3. Press \( \text{to save your setting.} \)

You can also assign one more action for Edge Sense. For details, see Enabling Advanced mode on page 53.
Enabling Advanced mode

Turning on Advanced mode activates the squeeze and hold gesture. In this mode, you’ll be able to do the following with Edge Sense:

- While you’re using HTC Camera, squeeze and hold the lower sides of your phone to switch between the main and front cameras. You can do this only if the squeeze gesture—whether it’s the short squeeze or squeeze and hold—is set to Launch Camera app.

- Do two different actions when squeezing, depending on how long you squeeze. By default, short squeeze opens the Camera app. Squeeze and hold launches the default voice assistant which is Google Assistant. You can assign these two squeeze gestures to other actions.

1. From the Home screen, swipe up and then tap Settings > Edge Sense.
2. Select the Enable advanced mode check box.
3. Follow the onscreen instructions to set the squeeze force levels.
4. To change the action the phone takes when you squeeze it, tap Customize short squeeze action, and then choose your preferred option.
5. To change the action the phone takes when you squeeze and hold it, tap Customize squeeze & hold action, and then choose your preferred option.
6. Press ✅ to save your settings.
Typing with your voice with Edge Sense

Type using your voice instead of the onscreen keyboard.

- Check and make sure to download the latest HTC Edge Sense version from Google Play Store.
- In **Settings > Edge Sense**, make sure the **Keyboard** option is selected under In-app options.

1. Open an app where you want to enter text.
2. With the onscreen keyboard showing, squeeze the lower sides of your phone, and then speak the words you want typed.

   ![Illustration of squeezing the phone](image)

   If you paused speaking, squeeze again or tap the microphone icon on the screen to resume voice typing.

   In **Advanced mode**, launching Google Assistant is assigned to the squeeze and hold gesture by default. See **Enabling Advanced mode** on page 53. While you're not in the Camera app or the onscreen keyboard is not showing, squeeze and hold the lower sides of your phone to launch Google Assistant. You can then use your voice to do a web search, ask questions such as about the weather, and more.

Assigning another voice assistant app to Edge Sense

You can set Edge Sense to use another voice assistant app that you downloaded from Google Play Store.

1. From the Home screen, swipe up and then tap **Settings > Edge Sense**.
2. Tap **Customize short squeeze action** or **Customize squeeze & hold action**, depending on which type of squeeze gesture the default voice assistant is currently assigned to.
3. Tap **Launch default voice assistant > Assist app**.
4. Select the voice assistant app you want to use with Edge Sense, and then tap **OK**.
Adjusting the squeeze force level

If you experience accidentally launching Camera or an assigned shortcut while holding the sides of your phone, tune Edge Sense to make it detect the strength of your squeeze more effectively.

1. From the Home screen, swipe up and then tap **Settings > Edge Sense**.
2. Tap **Adjust your squeeze force level**.
3. Tap **Test your squeeze force**.
4. Follow the onscreen instructions to complete the process.

Squeezing to perform actions in your apps

Edge Sense lets you perform certain actions in your apps by just squeezing your phone.

There are default apps that are already predefined with squeeze gestures to perform actions:

- To see all the default apps with predefined actions, your phone needs to be connected to the Internet and these apps must already be installed on your phone. Also, you need to tap **Add more in-app options** and then tap **Agree** the first time you use the in-app options feature.
- Most of the default apps are not selected. You need to select them to enable their squeeze gestures.
Assigning in-app actions to squeeze gestures

Per app, you can customize squeeze gestures to do a tap or double-tap on a specific area on the screen.

- If Advanced mode is not enabled in Edge Sense, you can only customize the short squeeze gesture.
- There are default apps that are already predefined with certain actions. See Squeezing to perform actions in your apps on page 55.

1. From the Home screen, swipe up and then tap **Settings > Edge Sense**.
2. Under In-app options, tap **Add more in-app options**.
3. Tap the app you want to customize.
4. Tap **Short squeeze**.
5. Go to the screen in the app where you want to apply the squeeze gesture.
6. Tap ![ ], and then tap an area such as an onscreen button you want to assign.
7. Choose whether to assign a **Tap** or **Double-tap** action, and then tap **OK**.
8. Enter a name for the customized action, and then tap **Save**.
9. To customize the squeeze and hold gesture, tap **Squeeze & hold > Add a new action** and repeat steps 5 to 8.
10. When done, tap ![ ] thrice to return to the Edge Sense screen.

You’ll see the app you’ve just customized under the In-app options list.

An example of assigning in-app actions

Here’s an example of customizing Edge Sense to start and stop the timer in the Clock app.

1. From the Home screen, swipe up and then tap **Settings > Edge Sense**.
2. Under In-app options, tap **Add more in-app options**.
3. In the app list, tap Clock.
4. Tap Short squeeze.
5. Tap \( \downarrow^+ \), and then tap the Timer tab to assign it to the short squeeze gesture.
6. Select the Tap action, and then tap OK.
7. Enter an action name, such as Go to Timer, and then tap Save.
8. Tap Squeeze & hold \( \Rightarrow \) Add a new action.
9. In the Clock app, swipe to the Timer tab.
10. Set the countdown time that you want. Then start the timer by tapping Start and let it finish the countdown.
11. To assign the start timer button to the squeeze and hold gesture, tap \( \downarrow^+ \), and then tap Start.
12. Select the Tap action, and then tap OK.
13. Enter an action name, such as Start or Stop Timer, and then tap Save.
14. Tap \( \leftrightarrow \) thrice to return to the Edge Sense screen.

If you also want to use squeezing to open the Clock app, tap Customize short squeeze or Customize squeeze & hold. Select Launch app, and then select Clock.

Now give it a try. After launching the Clock app, squeeze the lower sides of your phone to go to the timer screen, and then squeeze and hold to start the countdown. To stop the countdown, squeeze and hold again.

### Changing in-app actions

Whether it’s the default apps or your own customized apps, you can change the in-app actions that are assigned to their squeeze gestures.

1. From the Home screen, swipe up and then tap Settings \( \Rightarrow \) Edge Sense.
2. Under In-app options, tap the app you want to make adjustments to.
3. Choose whether to make adjustments to the Short squeeze or Squeeze & hold gesture.
4. If you have several actions already created, select the one you want to assign to the squeeze gesture. Or tap Add a new action to create a new one.

Tap \( \text{✍️} \) to change an action name that you’ve created.
HTC Alexa

What is HTC Alexa?

The help content here is based on the following app version: 1.20.9x.

HTC Alexa transforms your phone into an Alexa-capable device. Alexa is a cloud-based voice service that can search for information, play music, provide weather forecasts and news, and more. The more you use Alexa, the better it learns your information needs, speech patterns, vocabulary, and personal and location preferences.

Setting up HTC Alexa

You need an Amazon account to use HTC Alexa. If you don’t have one, create one on amazon.com.

When prompted, allow HTC Alexa to access your location information and to record audio so the app could give more accurate information and search results.

1. From the Home screen, tap 📲, and then find and tap HTC Alexa.

2. Tap Sign in with Amazon, and then sign in to your Amazon account.

3. Follow the screen instructions to complete set up. After finishing the set up, HTC Alexa launches.

4. Tap 📚 to learn what you can ask the app, or tap 🚀 to change the app settings.

If you have set up Edge Sense, you can open HTC Alexa just by squeezing the lower sides of your phone. On the HTC Alexa screen, tap ⚙️ > Edge Sense trigger > Customize squeeze action, and then select Launch HTC Alexa.
Using HTC Alexa

HTC Alexa answers questions, assists in voice shopping, provides news, and more.

1. Do any of the following:
   - Say “Alexa.”
   - If you’ve set up Edge Sense, squeeze the lower sides of your phone.

   If your phone has a screen lock, you’ll need to unlock the screen before HTC Alexa launches.

   - From the Home screen, tap 📡, and then find and tap **HTC Alexa**.

   HTC Alexa launches.

2. Ask a question or say a command. Try:
   - “Find me the nearest dog park.”
   - “What’s the weather in Seattle tomorrow?”
   - “How’s traffic going home?”
   - “Play Beethoven’s 5th Symphony.”

   You can add more functions to Alexa by installing new skills. Find and download skills from the Amazon Alexa skills store at [amazon.com](http://amazon.com).

To learn more about Alexa go to the [amazon.com](http://amazon.com) Help site and do a search.
Updates

Software and app updates

Download and install software updates for the latest performance enhancements, bug fixes, and security improvements. HTC U11 life can check and notify you if there’s a new update available. You can visit www.htc.com/us/go/htc-software-updates/ for news and details about your phone’s software updates.

Some app updates are available from HTC or your mobile operator, and you’ll receive notifications on your phone when there are new updates. Or you can install app updates from Google Play Store. Some HTC apps that are not preloaded in certain phones can also be downloaded from Google Play Store.

The information in this guide may not be most up-to-date if there are more recent software or app updates available.

Checking your system software version

Before installing a system software update, you can check first what Android version you have on your phone.

1. From the Home screen, swipe up and then find and tap Settings.
2. Tap About > Software information.
3. Check under Android version.

Enabling automatic updates

You can choose to automatically download and install software updates for HTC or mobile operator apps.

1. From the Home screen, swipe up and then find and tap Settings.
2. Tap About > Software updates.
3. To save on data usage, you can choose to update through Wi-Fi only.
4. Choose whether to auto-download system updates, app updates, or both.
   App updates are installed automatically. You’ll still need to confirm when to install system software updates.
Checking for updates manually

1. From the Home screen, swipe up and then find and tap Settings.
2. Tap About > Software updates.
3. Tap Check now.

Installing a software update

When HTC U11 life is connected to the Internet and there's a new software update available, the update notification icon appears in the status bar.

1. Slide the Notifications panel open, and then tap the system update notification.
2. If you don’t want to download the update using your data connection, select Update over Wi-Fi only.
3. Tap Download.
4. When download is complete, select Install now, and then tap OK.

After updating, HTC U11 life will restart.

Installing an application update

When Internet connection is on and there’s an available update for your HTC or mobile operator apps, the update notification icon appears in the status bar.

1. Slide the Notifications panel open, and then tap the update notification.
   
   The Updates screen opens with the list of application updates to be installed.

2. Tap an item to view its details, and then tap .
3. When you’re done reviewing the updates, tap Install. You’ll be asked to restart HTC U11 life if needed.

Installing app updates from Google Play Store

Most apps get updated with improvements and bug fixes through Google Play Store. You can manually update apps or set your phone to automatically download and install app updates when available.

1. On the Home screen, swipe up and then find and tap Play Store.
2. Tap to open the slideout menu.
3. Tap My apps & games.
4. On the Updates tab, you’ll see the list of apps that have updates available.

5. Tap **Update** beside the app you want to update.

   Tap **Update All** if you want to update all the apps.

   In Play Store, tap ☑️ > **Settings** > **Auto-update apps** to choose how you want Google Play Store to update your apps.
Home screen layout and fonts

Adding or removing a widget panel

- You won’t be able to add a new widget panel if you’ve already reached the maximum limit.
- HTC BlinkFeed always appears as the first panel (if it’s not removed). A widget panel cannot be added before HTC BlinkFeed.

1. Press and hold an empty space on a widget panel.
2. Tap Edit page.
3. To add a new widget panel, swipe left until you see the + icon, and then tap it.
4. To remove a widget panel, swipe left or right until you see the panel, and then tap Remove.
5. When done, press ✅.

Arranging widget panels

A widget panel cannot be moved and inserted before HTC BlinkFeed.

1. On HTC BlinkFeed or any widget panel, slide two fingers together to customize the Home screen.
2. Press and hold a widget panel thumbnail, and then drag it left or right to the position that you want.
3. When you’re done arranging widget panels, press ✅.

Changing your main Home screen

Set HTC BlinkFeed or a widget panel as your main Home screen.

1. Press and hold an empty space on a widget panel.
2. Tap Edit page.
3. Swipe left or right until you see the panel that you want to use as your main Home screen.
4. Tap Set as home.
5. Press ⬜️.

Pressing HOME from an app will first return you to the last panel you were in. Just press HOME again to go to your main Home screen.

Setting your Home screen wallpaper

Choose from the available wallpapers, or use any photo you’ve taken with the camera.

You can only change the wallpaper while in Classic home screen layout.

1. From the Home screen, swipe up and then tap Settings > Personalize.
2. Tap Change wallpaper.
3. Choose from where you want to select a wallpaper.
4. Tap Apply or Set wallpaper.
5. If prompted, choose whether to use the wallpaper for the Home screen, lock screen, or both.

Changing the default font size

1. From the Home screen, swipe up and then tap Settings > Display, gestures & buttons.
2. Tap Font size, and then select the size you want.
Widgets and shortcuts

Launch bar

The launch bar gives you one-touch access to commonly used apps and other shortcuts. You can replace the apps on the launch bar with the ones you often use.

- You can only customize the launch bar while in Classic layout.
- If you’re using the Freestyle layout, you will only see the launch bar on the lock screen. Icons displayed will be the same ones you have in the Classic layout.

1. Press and hold the app you want to replace, and then drag it out to 🛠.

2. Tap 📖 to go to the Apps screen.

3. Press and hold an app, and then drag it to the empty slot on the launch bar.

- You can also group apps on the launch bar into a folder. See Grouping apps on the widget panel and launch bar on page 66.
- The apps or other shortcuts on the lock screen are the same as the ones on the launch bar.

Adding Home screen widgets

Widgets make at-a-glance important information and media content readily available.

1. Press and hold an empty space on a widget panel.
2. In the pop-menu, tap Add apps and widgets.
3. Tap 📖 > Widgets.
4. Scroll through the widgets, or tap ⬇ to search for a specific widget.

5. Press and hold a widget, and then drag it to a widget panel you want to add it to.

---

### Changing the widget settings

You can modify basic settings of some widgets.

1. Press and hold a widget on your Home screen, and then drag it to ☐.
2. Customize the widget settings.

---

### Resizing a widget

Some widgets can be resized after you’ve added them to your Home screen.

1. Press and hold a widget on the Home screen, and then release your finger. If a border appears, that means the widget is resizable.
2. Drag the sides of the border to enlarge or shrink the widget size.

---

### Adding Home screen shortcuts

Place apps you often use on any widget panel of your Home screen. You can also add shortcuts to frequently used settings, favorite contacts, and more.

1. Press and hold an empty space on a widget panel.
2. In the pop-up menu, tap Add apps and widgets.
3. Tap ☐ > Apps or Shortcuts.
4. Scroll through the apps or shortcuts, or tap ⬇ to search for one.
5. Press and hold an app or shortcut, and then drag it to a widget panel you want to add it to.

To add an app from the Apps screen, press and hold the app, and then drag it to a widget panel.

---

### Grouping apps on the widget panel and launch bar

1. Press and hold an app, and then drag it over to another app to automatically create a folder.

2. Tap the folder to open it.
3. Tap the folder window’s title bar, and then enter a new folder name.

4. Add more apps into the folder. Tap +, select your apps, and then tap Done.

You can also add shortcuts to settings or information to a folder. Add a shortcut first to a widget panel, and then drag it over to the folder.

Removing items from a folder

1. On the launch bar or widget panel, tap a folder to open it.

2. Press and hold an app or shortcut in the folder, and then drag it out to .

Moving a Home screen item

You can easily move a widget, icon, or sticker from one widget panel to another.

1. Press and hold a Home screen item with one finger.

2. With another finger, flick left or right to rotate the screen to another widget panel.

3. Release the item to where you want to move it.

Removing a Home screen item

1. Press and hold the widget, icon, or sticker you want to remove, and then drag it to .

2. When the item turns red, lift your finger.
Sound preferences

Changing your ringtone

1. From the Home screen, swipe up and then tap Settings > Sound & notification.
2. Tap Ringtone.
   Or in dual SIM models, tap Slot 1 ringtone or Slot 2 ringtone.
3. Select a ringtone from the list.
4. If you want to add a ringtone, tap + and then choose where you want to add the ringtone from.
5. When you're done selecting your ringtone, tap Apply.

Changing your notification sound

1. From the Home screen, swipe up and then tap Settings > Sound & notification.
2. Tap Default notification sound, and then select one from the list.
3. Tap Apply.

Setting the default volume

1. From the Home screen, swipe up and then tap Settings > Sound & notification.
2. Slide the volume bars for each type of sound source.
Tuning your HTC USonic earphones

Experience music tuned to your ears when you use your HTC USonic earphones with HTC U11 life. The earphones will scan your ears to determine the output level that best suits you.

The HTC USonic earphones can only be used with HTC U11 life and other compatible HTC phones supporting HTC USonic.

1. Plug your HTC USonic earphones into the phone, and then put the ear buds into your ears.
2. If this is your first time to plug in the earphones and you’re prompted to set up a personal audio profile, tap **Start**.
   
   Or go to Settings and then tap **HTC USonic with Active Noise Cancellation**.
3. Tap **Start scanning now** and then wait for the phone to finish setting up your audio profile.
4. Tap **Done**.

- You can add another profile for the same or another set of the HTC USonic earphones. Just tap **HTC USonic with Active Noise Cancellation > +**.
- HTC USonic is not available over HDMI, Bluetooth, Miracast™, or USB audio out.

Turning Active Noise Cancellation on or off

Active Noise Cancellation tunes out distracting and annoying background noise. It is turned on by default after you’ve created your personal audio profile for the first time. With the HTC USonic earphones plugged in, hear music, videos, or games clearly without needing to turn up the volume in loud environments. When you don’t need Active Noise Cancellation, you can turn it off.

In some regions, you may need to download and install the latest system update to turn Active Noise Cancellation on or off separately from your personal audio profile.

- To turn Active Noise Cancellation off or back on, slide the Notifications panel open, and then tap **HTC USonic with Active Noise Cancellation > +** on the notification.
- Turning off your personal audio profile also turns off Active Noise Cancellation. While using an app that plays audio, slide the Notifications panel open, and then tap **Disable HTC USonic**. Or go to Settings, and then tap the **HTC USonic with Active Noise Cancellation On/Off** switch.

When you turn your HTC USonic personal audio profile back on, Active Noise Cancellation also toggles on or off depending on its previous state.
Taking photos and videos

HTC Camera

Take great photos and videos with the camera. For your convenience, there’s more than one way to launch the Camera app.

- If you’ve set up Edge Sense, just squeeze the lower sides of the phone anytime—whether the display is on or off.
  
  For details, see What is Edge Sense? on page 50 and Taking camera shots using Edge Sense on page 52.

- On the Home screen, tap the camera icon to open the Camera app.

- Press POWER twice while the display is off.

Make sure Quick launch camera is selected in Settings > Display, gestures & buttons.

You’ll see Photo mode, which is the default capture mode.

Taking photos and videos

**Zooming**

Before taking a regular photo or video, slide two fingers apart to zoom in or together to zoom out. You can also freely zoom in or out while recording.

**Turning the camera flash on or off**

Tap the flash icon to choose a flash setting.

When using ![flash icon] or ![flash icon], the camera intelligently sets the best flash brightness for your photo.

In **Selfie Photo** mode, you can also tap the flash icon to turn the screen flash on or off.

**Using the volume buttons for capturing**

In the Camera app, you can set the VOLUME buttons to function as the shutter release or zoom controls.

1. On the Home screen, tap the camera icon to open the Camera app.
2. Tap ![menu icon] to open the slideout menu.
3. Tap **Settings > Volume button options**.
4. Choose how you want to use the volume buttons when you’re in the Camera app.

**Choosing a capture mode**

Switch to a capture mode to use for taking photos or videos. The camera on HTC U11 life separates capture modes into categories so that you can quickly find which mode you want.

1. Tap ![menu icon] to open the slideout menu.
   
   You can also swipe right from the left edge in landscape orientation or swipe down from the top edge in portrait orientation.

2. Scroll through the menu to see the available capture modes.

3. Tap the capture mode you want to use.

4. To quickly switch between the front and main camera, tap ![front camera icon] on the Viewfinder screen.

5. You can quickly switch back to either Photo or Video mode when you’re in other capture modes without opening the slideout menu. Right below the main shutter button, just tap ![video icon] to switch back to Photo mode or ![video icon] to switch back to Video mode.
Capture mode settings

You can change the settings for some of the capture modes such as Photo or Video mode. To change settings, select a mode and then tap \( \text{ } \) to view and choose the available settings for the mode.

Taking a photo

1. On the Home screen, tap the camera icon to open the Camera app.

2. Switch to Photo mode, if you’re not in this mode. See Choosing a capture mode on page 71 for details.
3. Point the camera at what you want to capture. The camera adjusts the focus automatically as you move it. You can also tap the screen to change the focus to a different subject.

4. To manually adjust the exposure, tap the screen, and then drag your finger up and down.

   Or turn on **Touch autoexposure** so you can instantly brighten or darken a subject with a single tap. See Quickly adjusting the exposure of your photos on page 76.

5. When you’re ready to take the photo, tap 📷.

---

### Setting the photo quality and size

1. Switch to **Photo** or **Selfie Photo** mode. Or, select **Pro** mode.

2. Tap ← to open the slideout menu.

3. Tap the current setting—for example **16:9** — to change the photo quality and size, or aspect ratio.

### Tips for capturing better photos

To get better captures with the Camera app, here are some tips on what to do while taking your shots.

**Before capturing**

- Make sure that the camera and flash lenses are clean and without fingerprints. Use a soft, clean, microfiber cloth to wipe them.
- Hold the phone so that your fingers aren’t blocking the camera and flash lenses.
For clear, sharp shots

- Tap the screen to focus and dynamically readjust the image contrast, which is sometimes desirable if you wish to take a macro to get an off-center bokeh effect or take photos while you’re moving. Adjust the exposure to brighten the subject or make the subject look darker and richer. For details, see Quickly adjusting the exposure of your photos on page 76.

- If the subject is moving, on the Viewfinder, press and hold the subject to lock the focus.

- If there are parts of the image that are in shadows and others are in highlights, use HDR to capture multiple shots of different exposures and combine them into one shot. Keep HTC U11 life steady or place it on a level surface when using HDR. See Using HDR Boost on page 77 for details.

- When taking a panoramic photo, consider the whole scene and focus on an object that has a neutral tone to help keep the exposure balanced in the composite image.

- Make sure you’re not moving the camera when taking a photo, especially in low light conditions. Hold the phone steady and don’t move the camera while taking RAW photos in Pro mode.

- You can control image noise by adjusting the ISO, shutter, and exposure settings of your camera. Use Pro mode to tweak these, and save up to three different manual photography settings. See Manually adjusting camera settings on page 82.

  It also captures in RAW format, which is suitable for post processing photos. See Taking a RAW photo on page 83.

Other tips

- In Camera settings, tap Grid to help frame the subject better or improve the composition.

- After capturing, you can enhance the photo in the Google Photos app.

Selfies

Applying skin touch-ups with Live Makeup

Touch up your skin before taking your selfie. Live Makeup smoothenes your skin in real time.

Live Makeup is disabled when auto HDR is on.

1. On the Home screen, tap the camera icon to open the Camera app.

2. Switch to Selfie Photo mode. See Choosing a capture mode on page 71 for details.
3. If you don’t see the Live Makeup adjustment bar on the Viewfinder screen, tap ☰ to open the slideout menu, and then tap ⏐ to change the skin smoothing level, drag the adjustment bar slider.

Next time you want to take selfies without using Live Makeup, tap ☰ to open the slideout menu, and then tap ◦ to turn Live Makeup off.

**Taking selfies automatically**

Keep still to take an auto selfie—or just smile! You just need to turn this feature on in the camera settings.

1. On the Home screen, tap the camera icon to open the Camera app.
2. Switch to Selfie Photo mode. See Choosing a capture mode on page 71 for details.
3. Tap ☰ to open the slideout menu.
4. Tap Settings > Camera options.
5. Select the Auto selfie capture option, and then tap outside the slideout menu to close it.
6. Pose and frame yourself on the Viewfinder screen.
7. To take your selfie automatically, look at the front camera, and then:
   - Stay still until the white box turns green on the Viewfinder screen.
   - Or smile at the camera. Hold your smile for a few seconds until your shot is taken.

**Taking selfies with voice commands**

You can easily take photo or video selfies using simple voice commands. You just need to turn this feature on in the camera settings.

This feature may not be available in all languages.

1. On the Home screen, tap the camera icon to open the Camera app.
2. Switch to Selfie Photo or Selfie Video mode. See Choosing a capture mode on page 71 for details.
3. Tap ☰ to open the slideout menu.
4. Tap Settings > Camera options.
5. Select the Voice capture option, and then tap outside the slideout menu to close it.
6. Pose and frame yourself on the Viewfinder screen.

7. Look at the front camera, and then:
   - Say **Cheese** or **Capture** to take a photo selfie.
   - Say **Action** or **Rolling** to record a video selfie.

You can also use voice commands with the main camera. Switch to **Photo** mode, and then select the **Voice capture** option in the camera settings.

---

**Taking photos with the self-timer**

When you use the self-timer, the Camera app counts down before taking the shot. You can set the countdown time.

1. On the Home screen, tap the camera icon to open the Camera app.
2. Choose the capture mode you want to use. See **Choosing a capture mode** on page 71 for details.
3. Tap  to open the slideout menu.
4. Tap **Timer** to set the countdown time.
5. To start the timer, tap . The camera takes the photo after the countdown.

---

**Flipping the angle of selfies**

Do you want the angle of your shots to look exactly the same as how you see yourself on the Viewfinder screen?

1. Switch to **Selfie Photo** mode. To find out how to switch between capture modes, see **Choosing a capture mode** on page 71.
2. Tap  to open the slideout menu.
3. Tap **Settings > Camera options**.
4. Make sure the **Save mirrored selfies** option is selected.

---

**Quickly adjusting the exposure of your photos**

HTC U11 life features a quick way of adjusting the exposure level or brightness in real time. Turn **Touch autoexposure** on if you want the camera to automatically adjust the exposure when you tap a darker or overexposed area on the Viewfinder screen.

1. On the Home screen, tap the camera icon to open the Camera app.
2. Switch to **Photo** or **Panorama** mode. See **Choosing a capture mode** on page 71 for details.
3. Tap  to open the slideout menu.
4. Tap **Settings**.
5. Select the **Touch autoexposure** option.
6. Tap on the dark area to brighten it, or tap on the overexposed area to make it darker.

   To fine tune further, you can manually adjust the exposure by dragging your finger up and down.

7. When you’re ready to take the photo, tap 📸.

Taking continuous camera shots

Do you want to take photos of moving subjects? Whether it’s your kid’s football game or a car race, you can capture the action.

1. On the Home screen, tap the camera icon to open the Camera app.
2. Switch to Photo mode. See Choosing a capture mode on page 71 for details.
3. Press and hold 📸.

   The camera takes consecutive shots of your subject.

Using HDR Boost

When shooting portraits against a bright background, use HDR Boost, short for High Dynamic Range, to capture your subjects clearly. HDR Boost also works in low light situations, giving you clearer photos with less noise.

HDR Boost works best when your subject is steady. The camera takes multiple shots at different exposure levels and combines them into one enhanced photo.

1. On the Home screen, tap the camera icon to open the Camera app.
2. Switch to Photo mode. See Choosing a capture mode on page 71 for details.
3. Make sure that HDR or Auto is selected. If not, tap HDR to change it.
   
   HDR auto is also available in Selfie photo mode, and is enabled by default.
4. Frame the scene or subject you want to capture.
5. Tap 📸.

Taking a panoramic selfie

With the Selfie Panorama mode, you can invite more people to take a selfie with you.

Some camera features are not available when you’re in Selfie Panorama mode, such as zooming.

1. On the Home screen, tap the camera icon to open the Camera app.
2. Switch to Selfie Panorama mode. See Choosing a capture mode on page 71 for details.
3. Tap ▼ to open the slideout menu.

4. Make sure that ☑ is selected.

5. Hold the phone at face level and in portrait orientation.

6. When you’re ready to take the center shot, tap ◼.

7. While holding your phone steadily, slowly swivel left or right on the phone’s axis until you see the white capture box move to the side panel of the panorama overlay.

   The capture box turns green and you’ll hear a shutter sound as the photo is taken.

8. Then, slowly swivel to the opposite side until you see the white capture box move to the other side of the panorama overlay.

   The capture box turns green and you’ll hear a shutter sound as the photo is taken.

The camera stitches the frames into a single photo.

For best results, closely follow the straight and linear path of the capture box on the panorama overlay. Try to not tilt the phone up or down or move the capture box away from its path.
Taking a super wide-angle panoramic selfie

If you have more friends or scenery to capture, set the Selfie Panorama mode to **Widest** to stitch five photos instead of three.

Some camera features are not available when you’re in Selfie Panorama mode, such as zooming.

1. On the Home screen, tap the camera icon to open the Camera app.
2. Switch to **Selfie Panorama** mode. See Choosing a capture mode on page 71 for details.
3. Tap ‹ to open the slideout menu.
4. Tap ‹ to switch to ‹.
5. Hold the phone at face level and in portrait orientation.
6. When you’re ready to take the center shot, tap .
7. While holding your phone steadily, slowly swivel left or right on the phone’s axis until you see the white capture box move to the side panel of the panorama overlay.
   
   The capture box turns green and you’ll hear a shutter sound as the photo is taken. When the second photo is taken, you’ll see that the panorama overlay becomes wider.
8. Continue to slowly swivel your phone left and right to fill the entire panorama overlay with your photos.

   For best results, follow the capture sequence indicated in the illustration below.

The camera stitches the frames into a single photo.
Taking a panoramic photo

Get a wider shot of landscapes in one sweep.

Some camera features are not available when you’re in Sweep panorama mode, such as zooming.

1. On the Home screen, tap the camera icon to open the Camera app.

2. Switch to Panorama mode. See Choosing a capture mode on page 71 for details.

3. When you’re ready to take the shot, tap ⭐.

4. Pan left or right in either landscape or portrait view. Hold HTC U11 life as steadily as you can to automatically capture frames.

   You can also tap ⚪️ to stop capturing anytime.

The camera stitches the frames into a single photo.
Advanced camera features

Recording videos in slow motion

Relive high speed action bit by bit and add a touch of suspense to your videos.

Audio is recorded when you’re in this mode, but will only be available when video is played back in normal speed.

1. On the Home screen, tap the camera icon to open the Camera app.
2. Switch to Slow motion mode. See Choosing a capture mode on page 71 for details.
3. Tap \( \odot \) to start recording.
4. To stop recording, tap \( \odot \).

Recording a Hyperlapse video

Want to have a fast motion effect in your video? Use Hyperlapse mode to speed videos up to 12 times.

1. On the Home screen, tap the camera icon to open the Camera app.
2. Switch to Hyperlapse mode. See Choosing a capture mode on page 71 for details.
3. When you’re ready to start recording, tap \( \odot \).
4. Change focus to a different subject or area by tapping it on the Viewfinder screen.
5. Tap the flash icon to turn the flash on or off.
6. To stop recording, tap \( \odot \).

Choosing a scene

Instead of manually adjusting the camera settings, you can select a scene with predefined settings that best matches the environment you’re capturing.

1. On the Home screen, tap the camera icon to open the Camera app.
2. Switch to Pro mode. See Choosing a capture mode on page 71 for details.
3. Tap A and then choose a preset scene. Select:
   - 🌃 when capturing nightscape such as a city skyline or street with city lights. Keep the camera steady when taking the shot for best results.
   - ⚽️ when capturing a fast-moving subject such as your kid playing sports or a moving car.
   - 🌸 when capturing a close-up shot of a subject such as a flower or insect.
4. When you’re ready to take the photo, tap 📷.

If you need to manually adjust a scene and save it as a new preset, see Manually adjusting camera settings on page 82.

### Manually adjusting camera settings

Want to have expert command of your camera settings for different environments or lighting conditions? Use Pro mode to manually adjust the values for settings like white balance, exposure, ISO, and more. You can then save the adjustments for reuse.

1. On the Home screen, tap the camera icon to open the Camera app.
2. Switch to Pro mode. See Choosing a capture mode on page 71 for details.
3. Tap a setting, and then drag its slider to make adjustments.
   - Tap a setting again to hide the slider.
4. To save the adjustments as a custom setting, tap 📦, select Custom 1, 2, or 3, and then tap Save.
   - To use one of your custom settings, tap A or 🌸, and then select the custom setting (球星, 🌸, 🌸, or 🌸) to use.
5. To change a setting back to auto, tap 🌸.
6. When you’re ready to take the photo, tap 📷.
Taking a RAW photo

Want to keep more detail in your shots, or fix the lighting in post processing? With Pro mode, you can take photos that will be saved as RAW image files in DNG format, along with a JPG compressed version.

RAW image files take up a lot of storage space. It’s recommended to use a storage card as the default storage for photos and videos.

1. On the Home screen, tap the camera icon to open the Camera app.
2. Switch to Pro mode. See Choosing a capture mode on page 71 for details.
3. Tap  to open the slideout menu.
4. Make sure  is selected. If not, tap  to change it.
   Or, tap  to switch to  if you only want to save a JPG compressed version.
5. Tap .

How does the Camera app capture RAW photos?

The Camera app captures a photo in both the DNG RAW format and JPG format.

Digital Negative (DNG) is an open-standard lossless RAW image format. Since a RAW file is typically 2 to 6 times larger than a JPEG file and is not viewable in most photo viewer apps, a photo is captured in both DNG and JPG formats. When you use the Google Photos app, you’ll see a  icon on a photo to indicate that there is a DNG RAW format version of the file.

RAW photos are not processed when captured to preserve most of the original image data—such as dynamic range—so you can adjust lighting or make professional adjustments using advanced editing tools. After making adjustments, save the RAW photo as a JPG file if you want to print or share it.
What you can do on Google Photos

Here are some of the things you can do when using Google Photos on your phone.

- View, edit, and share the photos and videos you’ve taken on your phone. You can also access the media files previously backed up to your Google Account.
- To select photos and videos, press and hold a thumbnail to select one. Tap a date to select all the media files under it. Or, press and hold a thumbnail as your first selection, and then drag your finger to the last item you want to select.
- Enhance RAW photos taken using the HTC Camera app.
- Add Hyperlapse effect to your videos.
- Change the speed of your slow motion videos.

To learn more about Google Photos, tap ≡ > Help. Or, you can visit support.google.com/photos.

Viewing photos and videos

When you open Google Photos for the first time, sign in to your Google Account, if prompted, and choose whether to turn backup and sync on or off.

1. From the Home screen, swipe up and then find and tap Photos. You’ll see your local and synced photos and videos organized by date.
2. To switch to another view, tap : > Layout, and then choose how you want to view your media files.
3. Tap a thumbnail to view it in full screen.
4. To view only the photos and videos saved on the phone storage and storage card, tap ≡ to open the slideout menu, and then tap Device folders.

Editing your photos

1. From the Home screen, swipe up and then find and tap Photos.
2. Tap a photo thumbnail to view it in full screen.
3. Tap ☰, and then do any of the following:
   - Tap ☰ to adjust the brightness, color, and more.
   - Tap 📷 to apply a filter to the photo.
   - Tap 📺 to rotate or crop the photo.

4. While you’re editing, press and hold the photo to compare your changes to the original.

5. After making your adjustments, tap Save.

Enhancing RAW photos

After capturing RAW photos, you can improve its contrast and detail from the Photos app.

1. From the Home screen, swipe up and then find and tap Photos.

2. Find and tap the RAW photo you want to enhance.
   RAW photos are marked with the 📷 icon on the thumbnail.

3. Tap ☰, and then tap RAW Enhancement.

4. Tap 📷 to toggle between before and after photos.

5. Tap when done.

Trimming a video

1. From the Home screen, swipe up and then find and tap Photos.

2. Tap a video thumbnail to view it in full screen.

Videos captured using hi-res audio cannot be trimmed.

3. Tap ☰, and then drag the trim sliders to the part where you want the video to begin and end.

4. Tap 📺 to preview your trimmed video.

5. Tap Save.

The trimmed video is saved as a copy. The original video remains unedited.
Changing the playback speed of a slow motion video

Adjust the playback speed of a selected section of a slow motion video.

You can only change the video playback speed of videos captured using slow motion in the Camera app.

1. From the Home screen, swipe up and then find and tap Photos.
2. Find and tap the thumbnail of slow motion video to view it in full screen.
   Slow motion videos are marked with the icon on the thumbnail.
3. Tap the screen to see the onscreen controls.
4. Frame the sequence you want to slow down by moving the left and right sliders.

Editing a Hyperlapse video

If you captured a video in Hyperlapse mode, you can apply varying speeds to different sections of the video.

1. From the Home screen, swipe up and then find and tap Photos.
2. Find and tap the Hyperlapse video to view it in full screen.
   Hyperlapse videos are marked with the icon on the thumbnail.
3. Tap .
4. Move the left and right sliders to divide your video into sections.
5. Tap a section that you want to adjust, and then tap a dot that corresponds to particular playback speed to modify the selected section.
6. Repeat the previous step for the remaining sections.
7. Tap .

The edited video is saved as a copy. The original video remains unedited.
Adding a Hyperlapse effect on a regular video

1. From the Home screen, swipe up and then find and tap Photos.
2. Find and tap the thumbnail of a video to view it in full screen.

You cannot add a Hyperlapse effect on a video that was captured using hi-res audio.

3. Tap ![Edit in Zoe Video Editor.]
4. Tap Create a Hyperlapse video.
5. Move the left and right sliders to divide your video into sections.
6. Tap a section that you want to adjust, and then tap a dot that corresponds to particular playback speed to modify the selected section.
7. Repeat the previous step for the remaining sections.
8. Tap ✓.

The edited video is saved as a copy. The original video remains unedited.
Phone calls

Making a call with Smart dial

You can either dial a number directly, or use Smart dial to quickly place a call. Smart dial searches and calls a stored/synced contact or a number from your call history.

1. On the Home screen, tap the phone icon to open the Phone app.
2. Enter the phone number or first few letters of the contact’s name to see matching contacts.
3. To see all the numbers and contacts that match, tap the number (for example, 8 matches).
4. Tap the contact you want to call.

If the phone number has an extension, tap ☑️ after connecting to the main line and then dial the extension number.

Making a call with your voice

Call a contact hands-free using your voice.

1. On the Home screen, tap the phone icon to open the Phone app.
2. Tap 📞.
3. Say the name of contact you want to call. For example, say "Call [person's name in phonebook]."
4. Follow screen instructions to make the call.

Dialing an extension number

To skip voice prompts when dialing an extension number, do one of the following:

- After dialing the main number, press and hold *. A comma (,) is added to the number you are dialing. Enter the extension number, and then tap the call button. You will be connected to the mainline and then to the extension number.
- After dialing the main number, press and hold # to add a semicolon (;). Enter the extension number after the semicolon , and then tap the call button. After connecting to the main line, tap Send to dial the extension number.

You can save phone numbers with an extension in the People app.
Speed dial

Use Speed dial to call a phone number with a single tap.

1. On the Home screen, tap the phone icon to open the Phone app.
2. Tap : > Speed dial - . You can also press and hold an unassigned key on the dialpad, and then tap Yes.
3. Select a contact from the list.
4. On the Speed dial screen, choose the phone number of the contact to use, and a speed dial key to assign.
5. Tap Save.

To use Speed dial, press and hold the speed dial number you want to call.

Calling a number in a message, email, or calendar event

When you receive a text message, email, or calendar event that has a phone number in it, you can just tap the number to place a call.

Receiving calls

When you receive a phone call from a contact, the Incoming call screen appears.

HTC U11 life will automatically adjust the ringtone volume if Quiet ring on pickup and Pocket mode are selected in Settings > Sound & notification.

Answering or rejecting a call

Do one of the following:
- Tap Answer or Decline.
- If you’ve set up a lock screen, drag or upwards.

Muting the ringing sound without rejecting the call

Do one of the following:
- Press the VOLUME DOWN or VOLUME UP button.
- Press the POWER button.
- Place HTC U11 life face down on a level surface.

If Flip to mute option in Settings > Sound & notification is set to Mute once, HTC U11 life will still ring when there are subsequent incoming calls.
Returning a missed call

You'll see the missed call icon ⌘ in the status bar when you miss a call.

1. Slide the Notifications panel open to check who the caller is.
2. To return the call, tap Call back.

If you have multiple missed calls, tap the missed calls notification to open the Call History tab.

Emergency call

In some regions, you can make emergency calls from HTC U11 life even if the nano SIM card has been blocked or if you don’t have one installed.

If you don’t have a network signal, you won’t be able to make an emergency call.

1. On the Home screen, tap the phone icon to open the Phone app.
2. Dial the emergency number for your locale, and then tap Call.

If you’ve enabled but forgotten your lock password or lock pattern, you can still make emergency calls by tapping Emergency on the screen.

What can I do during a call?

When a call is in progress, you can turn the speakerphone on, place the call on hold, and more.

Putting a call on hold

To put the call on hold, tap → Hold. The status bar then displays the hold call icon ⌘.
To resume the call, tap → Unhold.

Switching between calls

If you’re already in a call and you accept another call, you can switch between the two calls.

1. When you receive another call, tap Answer to accept the second call and put the first call on hold.
2. To switch between the calls, tap the person you want to talk to on the screen.
Turning the speakerphone on or off during a call

To decrease potential damage to your hearing, do not hold HTC U11 life to your ear when the speakerphone is on.

- On the call screen, tap 📞. The speakerphone icon 🎤 appears in the status bar.
- To turn the speakerphone off, tap 📞.

Muting the microphone during a call

On the call screen, tap 🎤 to toggle between turning the microphone on or off. When the microphone is turned off, the mute icon 🎤 appears in the status bar.

Ending a call

Do one of the following to end the call:

- On the call screen, tap **End Call**.
- Slide the Notifications panel open, then tap **Hang Up**.

Setting up a conference call

Conference calling with your friends, family, or co-workers is easy. Make or accept a call, and then simply dial each subsequent call to add it to the conference.

Make sure that you have conference calling service activated. Contact your mobile operator for details.

1. Make a call to the first conference call participant.
2. When connected, tap ❡, and then dial the number of the second participant. The first participant is put on hold.
3. When connected to the second participant, tap ✈️.
4. To add another participant, tap ❡, and then dial the number of the contact.
5. When connected, tap ✈️ to add the participant to the conference call. Tap ❓ to access options such as ending the call with a participant.
6. To end the conference call, tap **End Call**.
Call History

Use Call History to check missed calls, your dialed numbers, and received calls.

1. On the Home screen, tap the phone icon to open the Phone app.
2. Swipe right to go to the Call History tab.
3. Do one of the following:
   - Tap a name or number in the list to call.
   - Press and hold a name or number in the list to display the options menu.
   - Tap ☑️ to display just a particular type of call such as missed calls or outgoing calls.

Adding a new phone number to your contacts from Call History

1. On the Call History tab, tap + next to the new phone number.
2. Choose whether to create a new contact or save the number to an existing contact.

Clearing the Call History list

1. On the Call History tab, tap  to Remove call history.
2. Select the items you want to delete, or tap  to Select all.
3. Tap Delete.

Blocking a caller

When you block a phone number or a contact, all calls from the phone number or contact will be declined automatically.

On the Call History tab, press and hold the contact or phone number you want to block, and then tap Block contact.

You can always remove a caller from your blocked list. On the Call History tab, tap  > Blocked contacts. In the All tab, press and hold a contact, and then tap Unblock contacts.

Switching between silent, vibrate, and normal modes

Do one of the following:

- To change from silent to normal mode, press the VOLUME UP button twice.
- To change from vibrate to normal mode, press the VOLUME UP button.
- Go to Settings, and then tap Sound & notification > Sound profile.
Home dialing

When you’re on a trip abroad, it’s easy to dial friends and family from home.

Your home country code is automatically added when you call your contacts while roaming. But when manually entering a phone number to call, you need to enter a plus (+) sign and country code before the number.

Using a roaming service may incur additional charges. Check with your mobile operator for rates before using a roaming service.

Changing the default country code for Home dialing

1. From the Home screen, swipe up and then tap Settings > Call.
2. Tap Home dialing settings.
3. Select a country, and then tap OK.

Turning off Home dialing

If you prefer to manually enter complete phone numbers to call while roaming, you can turn off Home dialing.

1. From the Home screen, swipe up and then tap Settings > Call.
2. Clear the Home dialing option.
SMS and MMS

Sending a text message (SMS)

1. From the Home screen, tap ⬇️, and then find and tap Messages.
2. Tap +.
3. Enter a contact name or mobile number in the To field.
4. Tap the area that says Add text or your signature if you’ve set it.
5. Enter your message.
6. Tap ➡️ to send the message.

- Tap ← to save the message as a draft.
- There is a limit on the number of characters for a single text message (displayed above ➡️). If you exceed the limit, your text message will be delivered as one but will be billed as more than one message.
- Your text message automatically becomes a multimedia message if you enter an email address as the recipient, attach an item, or compose a very long message.

Replying to a message

1. From the Home screen, tap ⬇️, and then find and tap Messages.
2. Tap a contact (or phone number) to display the exchange of messages with that contact.
3. Tap the area that says Add text or your signature if you’ve set it.
4. Enter your message.
5. Tap ➡️.

Replying to a contact’s other phone number

When a contact has multiple phone numbers stored on HTC U11 life, you can select which phone number to reply to.

Keep in mind that if you don’t select another number, your response will be sent to the phone number that your contact used to send the last message.

1. While viewing the exchange of messages with a contact, tap ⬇️ ➡️ Recipient phone number and select which phone number you want to reply to.
2. Tap the area that says Add text, then enter your reply message.
3. Tap ➡️.
Resuming a draft message

If you switch to another app or if you receive an incoming call while composing a text message, the message is automatically saved as a draft.

1. From the Home screen, tap 📱, and then find and tap Messages.
2. Tap a draft message, and then edit the message.

💡 To see all draft messages in one place, tap 📱, and then tap Filter > Drafts.

3. Tap ➤.

How do I add a signature in my text messages?

If you’re using the HTC Messages app, here’s how to add a signature.

1. From the Home screen, tap 📱, and then find and tap Messages.
2. Tap 📱 > Settings > General.
3. Select the Use signature option, and then tap Signature.
4. Enter the text you want to use as your signature, and then tap OK.

💡 The signature will count toward the text message’s character limit.

Sending a multimedia message (MMS)

Before attaching and sending a high-resolution video, compress it first so that the file size doesn’t exceed the message size limit.

1. From the Home screen, tap 📱, and then find and tap Messages.
2. Tap ➤.
3. Enter a contact name, mobile number, or email address in the To field.
4. Tap the area that says Add text or your signature if you’ve set it.
5. Enter your message.
6. Tap ➤, and then choose an attachment type.
7. Select or browse for the item to attach.
8. After adding an attachment, tap ⬤ to see options for replacing, viewing or removing your attachment.

9. Tap ✉️ to send the message.

Tap ← to save the message as a draft.

**Sending a group message**

Group messaging makes it easy to send a message to multiple contacts all at once. You can choose to send a group SMS or group MMS.

Group MMS may incur extra data fees.

1. From the Home screen, tap ☐️, and then find and tap Messages.

2. Tap ☐️.

3. Tap ⌂️, and then select multiple recipients.

4. Tap Done.

5. To send a group SMS, tap ☐️, and then select Send as individual. Clear this option to send your message as a group MMS.

<table>
<thead>
<tr>
<th>Sending option</th>
<th>Sending and receiving</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Group SMS</strong></td>
<td>Your message will be sent to the recipients as a text message and you will be charged by your mobile operator for each message sent. Replies of your recipients are sorted separately.</td>
</tr>
<tr>
<td><strong>Group MMS</strong></td>
<td>Similar to a group chat, sending a group MMS lets your recipients join the conversation you’ve started. HTC U11 life also organizes message replies in a single conversation thread. If this is your first time to send a group MMS, you may need to enter your mobile phone number.</td>
</tr>
</tbody>
</table>

6. Tap the area that says Add text or your signature if you’ve set it.

7. Enter your message.

8. Tap ✉️ to send the message.
Forwarding a message

1. From the Home screen, tap ⚫️, and then find and tap Messages.
2. Tap a contact (or phone number) to view the exchange of messages with that contact.
3. Tap a message, and then tap Forward.

Moving messages to the secure box

You can move private messages to the secure box. You will need to enter a password to read these messages.

- The secure box does not encrypt messages.
- Messages stored on a nano SIM card cannot be moved to the secure box.

1. From the Home screen, tap ⚫️, and then find and tap Messages.
2. Tap a contact (or phone number) to display the exchange of messages with that contact.
3. Tap Move to secure box.
4. Select the messages, and then tap Move.

To move all the messages from a contact, on the Messages screen, press and hold the contact and tap Move to secure box.

- To read messages in the secure box, on the Messages screen, tap Secure. If it is your first time to use the secure box, set a password.
- To remove messages or contacts from the secure box, press and hold the contact (or phone number) and tap Move to general box.

Blocking unwanted messages

Declutter your Messages screen by moving spam messages from contacts to the block box. If you have blocked a contact, that contact’s text or picture messages will also be in the block box.

- Open the Messages app, press and hold a contact (or phone number) and tap Block contact.
- To block multiple contacts, tap Block contacts, select the contacts, and tap Block.

When the contact sends you messages, you will not see them in the Messages screen or receive notifications and calls.

To read messages in the block box, on the Messages screen, tap Block.
To remove messages or contacts from the block box, press and hold the contact (or phone number) and tap Unblock.

To completely discard future messages from blocked contacts, tap → Settings > General, and then clear the Save block message option.

Copying a text message to the nano SIM card

1. From the Home screen, tap 📱, and then find and tap Messages.
2. Tap a contact (or phone number) to display the exchange of messages with that contact.
3. Tap the message, and then tap Copy to SIM. The nano SIM card icon is displayed.

Deleting messages and conversations

Open the Messages app and do any of the following:

<table>
<thead>
<tr>
<th>To delete a</th>
<th>Do these steps</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Message</strong></td>
<td>Open the conversation thread with a contact, tap the message, and then tap Delete message.</td>
</tr>
<tr>
<td></td>
<td>To delete multiple messages within a conversation, tap ; → Delete messages &gt; Delete by selection, and then select the messages to delete.</td>
</tr>
<tr>
<td><strong>Conversation</strong></td>
<td>Press and hold a contact (or phone number), and then tap Delete.</td>
</tr>
<tr>
<td></td>
<td>To delete multiple conversations, tap ; → Delete threads, and then select the conversations to delete.</td>
</tr>
</tbody>
</table>

In the Messages settings, tap General > Delete old messages to auto delete old messages.

Preventing a message from being deleted

You can lock a message to prevent it from being deleted even if you delete the other messages in the conversation.

1. Open the Messages app.
2. Tap a contact (or phone number) to display the exchange of messages with that contact.
3. Tap the message that you want to lock.
4. Tap Lock message on the options menu. You’ll then see a lock icon for locked messages.
Contacts

Your contacts list

The People app lists all contacts you’ve stored on HTC U11 life and from online accounts you’re logged in to. Use the People app to easily manage communications with people that matter to you.

1. From the Home screen, tap ☰, and then find and tap People.

2. On your contacts list, you can:
   - View your profile and edit your contact information.
   - Create, edit, find, or send contacts.
   - Tap a contact photo to find ways to quickly connect with the contact.
   - See when a contact has sent you new messages.

To sort your contacts by their first or last name, tap ☰ > Settings > Sort contacts by.

Setting up your profile

Store your personal contact information to easily send it to other people.

1. From the Home screen, tap ☰, and then find and tap People.

2. Tap My profile.

3. Tap Edit my contact card.

4. Enter or edit your name and contact details.
5. Tap or the current photo to change your contact photo.
6. Tap ✓.

Filtering your contacts list
When your contacts list gets long, you can choose which contact accounts to show.

1. On the People tab, tap Phonebook.
2. Choose the accounts that contain the contacts you want to display.
3. Press ✓.

Finding people
Search for contacts stored on HTC U11 life, your company directory if you have an Exchange ActiveSync account, or social networks you’ve signed into.

1. From the Home screen, tap , and then find and tap People.
2. On the People tab, you can:
   - Find people in your contacts list. Tap , and then enter the first few letters of the contact name in the Search people box.
   - Find people on your company directory. Tap , enter the first few letters of the contact name in the Search people box, and then tap Search contacts in your Company Directory.

Adding a new contact

1. From the Home screen, tap , and then find and tap People.
2. On the People tab, tap . If you have email accounts set up on your phone, you will be prompted to select which account to save the contact.
3. Tap the Name field, and then enter the contact name. Tap to separately enter the contact’s given, middle, or family name and name suffix, such as Jr.
4. Select the Contact type. This determines which account the contact will sync with.
5. Enter the contact information in the fields provided.
6. Tap ✓.

When you tap the added contact in your contacts list, you’ll see the contact information and your exchange of messages and calls.
How do I add an extension number to a contact number?

While creating a new contact or editing a contact’s details in People, you can add an extension number to their number so you can skip the voice prompts when calling.

1. After entering the number of the main line, do one of the following:
   - Tap P to insert a pause before the phone dials the extension number. To insert a longer pause, enter P several times.
   - Tap W to be prompted to confirm the extension number.
2. Enter the extension number.

Why can’t I see newly added contacts in the People app?

Check if you’ve created the contact under a specific account type. On the People app, tap Phonebook, and then select the accounts or sources you want your contacts to show from.

Editing a contact’s information

Social network contacts cannot be edited.

1. From the Home screen, tap ☢️, and then find and tap People.
2. On the People tab, press and hold the contact, and then tap Edit contact.
3. Enter the new information.
4. Tap ✓.
Getting in touch with a contact

1. From the Home screen, tap ☎️, and then find and tap People.
2. Tap a contact’s photo (not the name), and then choose how you want to get in touch with that contact.

For more ways of getting in touch with your contact, tap an icon below the contact photo.

Importing or copying contacts

Importing contacts from your nano SIM card

1. From the Home screen, tap ☎️, and then find and tap People.
2. On the People tab, tap  ⚙️  > Manage contacts.
3. Tap Import/Export contacts > Import from SIM card.
4. If prompted, select which account you’d like to import your contacts to.
5. Select the contacts you want to import.
6. Tap Save.

Importing a contact from an Exchange ActiveSync account

1. On the People tab, tap  🔍  and enter the contact’s name or email address in the search box.
2. Tap Search contacts in your Company Directory.
3. Tap the name of the contact you want copied to HTC U11 life.
4. Tap  ✅  to import the contact.
Copying contacts from one account to another

You may not be able to copy contacts from certain social network accounts.

1. On the People tab, tap 📞 > Manage contacts.
2. Tap Copy contacts, and then choose a contact type or online account to copy from.
3. Select a contact type or account you want to save to.

Merging contact information

Avoid duplicate entries by merging contact information from different sources, such as your social network accounts, into one contact.

Accepting contact link suggestions

When HTC U11 life finds contacts that can be merged, you’ll see a link notification when you open the People app.

1. From the Home screen, tap ☰, and then find and tap People.
2. On the People tab, tap the Contact link suggestion notification when available. You’ll see a list of suggested contacts to merge.
3. Tap ☰ next to the contact you want to merge. Otherwise, tap ☰ to dismiss the link suggestion.

If you don’t want to receive contact link suggestions, on the People tab, tap ☰ > Settings. Clear the Suggest contact link option.

Manually merging contact information

1. On the People tab, tap the name of the contact (not the icon or photo) you want to link.
2. Tap ☰ > Link.
3. You can:
   - Under Suggest links, link the contact to an account.
   - Under Add contact, tap one of the options to link to another contact.

Breaking the link

1. On the People tab, tap the name of the contact (not the icon or photo) whose link you want to break.
2. Tap ☰ > Link.
3. Under the Linked contacts section, tap ☰ beside an account to break the link.
4. Tap Done.
Sending contact information

1. From the Home screen, tap ⚫️, and then find and tap People.

2. On the People tab, do one of the following:

<table>
<thead>
<tr>
<th>To send</th>
<th>Do this</th>
</tr>
</thead>
<tbody>
<tr>
<td>Someone’s contact information</td>
<td>Press and hold the name of the contact (not the icon or photo), and then tap Send contact as vCard.</td>
</tr>
<tr>
<td>Your contact information</td>
<td>Press and hold My profile, and then tap Send my profile.</td>
</tr>
</tbody>
</table>

3. Choose how you want to send the vCard.

4. Select the type of information you want to send.

5. Tap Send.

Sending multiple contact cards

1. On the People tab, tap ⚫️ > Send contacts.

2. Select the contacts whose contact information you want to share

3. Tap Send.

4. Choose how you want to send the contact cards.

Contact groups

Organize your friends, family, and colleagues into groups so you can quickly send a message or email to everyone in the group. We’ve also set up the Frequent group to automatically add the contacts you dial or get calls from the most.

HTC U11 life also syncs with groups you’ve created in your Google Account.

Creating a group

1. From the Home screen, tap ⚫️, and then find and tap People.

2. On the Groups tab, tap 📦.

3. Enter a name for the group, and then tap ⚫️ > Add contact to group.

4. Select the contacts you want to add, and then tap Save.

5. When your group is complete, tap Save.
Sending a message or email to a group

You will be charged for each text message sent. For example, if you send a message to a group of five people, you will be charged for five messages.

1. On the Groups tab, tap the group you want to send a message or email to.
2. Go to the Group action tab.
3. Choose if you want to send a group message or group email.

Editing a group

1. On the Groups tab, press and hold the group, and then tap Edit group.
2. You can:
   - Change the group name. You can only change the name for groups that you have created.
   - Add more contacts to the group. Tap Add contact to group.
   - Remove contacts from the group.
   - Rearrange group members. Drag at the end of the contact’s name to move it to its new position.
3. Tap Save.

Removing contact groups

1. On the Groups tab, tap Edit groups.
2. Select the contact groups you want to remove. You can only remove groups that you have created.
3. Tap Save.

Private contacts

If you don’t want to show a contact’s name and photo on the lock screen when you have an incoming call, add the contact to your private contacts list.

Adding a contact to the private contacts list

Contacts must have a phone number before they can be added to the private contacts list.

1. From the Home screen, tap , and then find and tap People.
2. On the People tab, press and hold the contact, and then tap Add to private contacts.

To view your private contacts list, on the People tab, tap Manage contacts > Private contacts.
Organizing your private contacts

1. On the People tab, tap ➕ > Manage contacts > Private contacts.

2. To add contacts to the private contacts list, tap ➕, select the contacts you want to add, and then tap Save.

3. To remove private contacts from the list, tap ➕ > Remove private contact, select the contacts you want to remove, and then tap Remove.
Battery

Tips for extending battery life

How long the battery can last before it needs recharging depends on how you use HTC U11 life. Try out some of these tips to help increase battery life.

Use the power management features

- Turn Power saver mode and Extreme power saving mode on in Settings.
- Monitoring your battery usage helps identify what’s using the most power so you can choose what to do about it. For details, see Checking battery usage on page 109.

Manage your connections

- Turn off wireless connections such as mobile data, Wi-Fi, or Bluetooth when not in use.
- Turn GPS on only when a precise location is needed, such as while using navigation or location-based apps. See Location settings on page 150.
- Turn on Airplane mode when you don’t need any wireless connections and you don’t want to receive calls or messages.

Manage your display

Lowering the brightness, letting the display sleep when not in use, and keeping it simple helps save battery power.

- Lower the screen brightness when you don’t need it. See Screen brightness on page 152.
- Set the screen timeout to a shorter time. See Setting when to turn off the screen on page 151.
- Don’t use a live wallpaper for your Home screen. Animation effects are nice to show off to other people but they drain your battery.

Changing your wallpaper to a plain, black background can also help a little. The less color is displayed, the less battery is used. See Setting your Home screen wallpaper on page 64.
Manage your apps

- Battery optimization helps extend battery standby time. See Battery optimization for apps on page 110.
- Install the latest software and application updates. Updates sometimes include battery performance improvements.
- Uninstall or disable apps that you never use.

  Many apps run processes or sync data in the background even when you're not using them. If there are apps that you don’t need anymore, uninstall them.

  If an app came preloaded and can’t be uninstalled, disabling the app can still prevent it from continuously running or syncing data. See Disabling an app on page 133.

Limit background data and sync

Background data and sync can use a lot of battery power if you have many apps syncing data in the background. It's recommended not to let apps sync data too often. Determine which apps can be set with longer sync times, or sync manually.

- In Settings, tap Accounts & sync and check what types of data are being synced in your online accounts. When the battery is starting to run low, temporarily disable syncing some data.
- If you have many email accounts, consider prolonging the sync time of some accounts.

  If you are using the HTC Mail app, select an account, tap Settings > Sync, Send & Receive, and then adjust the settings under Sync schedule.
- When you’re not traveling from one place to another, sync weather updates of only your current location, rather than in all of your named cities. Open the Weather app, and then tap to edit and remove unneeded cities.
- Choose widgets wisely.

  Some widgets constantly sync data. Consider removing the ones that are not important from your Home screen.
- In Play Store, tap Settings, and then tap Auto-update apps > Do not auto-update apps if you’re fine with updating apps from Play Store manually.

Other tips

To squeeze in a little bit more battery power, try these tips:

- Tone down the ringtone and media volume.
- Minimize the use of vibration or sound feedback. In Settings, tap Sound and choose which ones you don’t need and can disable.
- Check your apps' settings as you may find more options to optimize the battery.
Using power saver mode

Power saver mode helps to increase battery life. It reduces the usage of phone features that drain the battery such as location services and mobile data.

1. From the Home screen, swipe up and then find and tap Settings.
2. Tap Battery.
3. Tap the Power saver On/Off switch to turn power saver mode on or off.

To set when to automatically switch this mode on, tap Power saver, select the Automatically turn on power saver when battery life is below the level I specify option, and then select a battery level.

Extreme power saving mode

In times when you don’t need to use much of your phone, turn Extreme power saving mode on to extend battery life longer. In this mode, standby time can last longer than usual, and you can only use the most basic functions such as phone calls, text messaging, and email.

1. From the Home screen, swipe up and then find and tap Settings.
2. Tap Battery.
3. Tap the Extreme power saving mode On/Off switch to turn extreme power saving mode on or off.

If you want to set when to automatically switch this mode on, tap Extreme power saving mode, select the Automatically turn on extreme power saving mode when battery life is below the level I specify option, and select a battery level.

Under More information, tap Learn more for details on how Extreme power saving mode maximizes battery life.

Displaying the battery percentage

You can check the percentage of remaining battery power right from the status bar.

1. From the Home screen, swipe up and then find and tap Settings.
2. Tap Battery.
3. Tap the Battery percentage On/Off switch to show the battery percentage on the status bar.

Checking battery usage

See how the system and apps are using the battery and how much power is being used.

1. From the Home screen, swipe up and then find and tap Settings.
2. Tap Battery.
3. Tap ☰ > Show full device usage or Show app usage, and then tap an item to check how it’s using the battery.

4. If you see the Manage battery usage section while viewing battery use details, you can tap the option underneath it to adjust settings that affect battery usage.

Another way to check the battery usage per app is to go to Settings, and then tap Apps. Tap the app you want to check, and then tap Battery.

Checking battery history

Check how long you’ve been using HTC U11 life since the last charge. You can also see a chart that shows how long the screen has been on, and how long you’ve been using connections like the mobile network or Wi-Fi.

1. From the Home screen, swipe up and then find and tap Settings.
2. Tap Battery.
3. Tap the battery image to view battery usage over time.

Battery optimization for apps

When you have connections such as Wi-Fi on while the phone is in sleep mode, some apps may still continue to use the battery. Starting from Android 6.0, battery optimization is enabled for all apps by default which helps prolong battery standby time when you’re not using the phone.

The phone needs to be sitting idle for an extended period of time before battery optimization takes effect.

Turning battery optimization off in apps

If there are apps that you don’t want battery optimization enabled, you can turn the feature off in those apps.

1. From the Home screen, swipe up and then find and tap Settings.
2. Tap Battery.
3. Tap ☰ > Battery optimization.
4. Tap Not optimized > All apps to see the complete list of apps.
5. To turn off battery optimization in an app, tap the app name, and then tap Don’t optimize > Done.

Repeat this process to turn off optimization in other apps.

To filter the list and see which apps have battery optimization disabled, tap All apps > Not optimized.
Freeing up storage space

As you use HTC U11 life, you’ll accumulate data and fill its storage capacity over time. Here are some tips on how to free up phone storage space.

Manage photos and videos

- After taking continuous camera shots, keep only the best shot. Discard the rest, if you don’t need them.
- After editing a photo or trimming a video, the original file is kept. Delete original files or move them elsewhere, such as to your computer.
- If you’re only sending videos through MMS, use a lower resolution. Hi-res video takes up more space.
- RAW image files take up a lot of storage space. It’s recommended to use a storage card as the default storage for photos and videos. If your storage card is running low on space, consider moving RAW image files to your computer.
- Turn on Storage manager to help handle old photos and videos on your phone.

Remove unused themes

Themes can quickly consume up storage space because themes can include images, sounds and icons. Remove themes you’re not using. See Deleting a theme in http://www.htc.com/support/apps/themes/.

Back up data and files

Keep only the most recent data in your apps and files that you often need to use. You can back up your other data and files. For some tips, see Ways of backing up files, data, and settings on page 117.

Remove or disable apps

Uninstall apps that you’ve downloaded if no longer need them. See Uninstalling an app on page 127. Preinstalled apps can be disabled when you’re not using them. See Disabling an app on page 133.

Manually free up space

On the Storage screen, tap Free Up Space. The phone then checks the phone storage and then suggest items that you may want to delete.
Move apps to the storage card

Third-party apps that you’ve downloaded and installed can be moved to the storage card if you’ve set up the card as internal storage. See Moving apps and data between the phone storage and storage card on page 113 and Moving an app to or from the storage card on page 114.

Types of storage

Starting from Android 6.0, there have been some changes on how and where downloaded apps and their data can be stored.

Phone storage

This is the internal storage which contains the Android system, preinstalled apps, email, text messages, and cached data from the apps. You can also install apps that you’ve downloaded and capture photos, videos, and screenshots to this storage.

Storage card

Use your storage card as a removable storage to store and access your media and other files on HTC U11 life or any Android phone, or set it up as an extension of the internal storage. See Should I use the storage card as removable or internal storage? on page 112.

USB storage

You can plug in an external USB storage device such as a USB flash drive or an SD card reader. You need a special cable to connect HTC U11 life and a USB storage device.

Should I use the storage card as removable or internal storage?

Use your storage card as removable storage when there’s already content such as your media and other files so that you don’t lose these content. If you have a brand new storage card, choose whether to use it as removable storage or set it up as an extension of the internal storage.

Removable storage

Use a new storage card as removable storage to be able to insert and use the card on HTC U11 life and other Android phones.

Internal storage

Set up a new storage card as internal storage for more privacy and secure use. This encrypts and formats the storage card to work just like the internal storage.

This also expands the internal storage space since:

- Captured screenshots, camera shots, media, and other files will be stored on the storage card.
- Third-party apps that you installed and their data can be moved between the phone storage and storage card.
Setting up your storage card as internal storage

When you insert a storage card that has not been used on HTC U11 life before, the card will be mounted as removable storage by default.

If the storage card is new or doesn’t have content you want to keep, you can format the storage card to use it as internal storage for HTC U11 life.

- See Should I use the storage card as removable or internal storage? on page 112 to find out the differences between using the storage card as removable storage or internal storage.
- If there are still files on the storage card, back up the files first before you format the card.

1. From the Home screen, swipe up and then tap Settings > Storage.
2. Under Portable storage, tap next to the storage card name.
3. Tap Format as internal > Erase & format > Format.
4. Follow the onscreen instructions to move your installed apps and their data from the phone storage to the storage card.

Moving apps and data between the phone storage and storage card

If you've set up your storage card as internal storage, you can move third-party apps that you installed and their data such as photos, media, and downloaded files to the storage card to free up phone storage space.

If you no longer want to use your storage card as internal storage, make sure to move all the apps and data from the card back to the phone storage.

1. From the Home screen, swipe up and then tap Settings > Storage.
2. Tap the name of your storage card if you're moving app data from the phone storage to the card, or tap Internal shared storage if you're moving data from the storage card back to the phone storage.
3. Tap > Migrate data.
4. Tap Move.

- Screenshots will also be migrated.
- When you take new photos or videos, capture new screenshots, or download new files after the migration, they will be saved to the new storage location.

Moving an app to or from the storage card

When you're running out of phone storage space, you can move a downloaded app and its data to the storage card if the card has been set up as internal storage.

If you need to reformat your storage card, make sure to move each app and its data back to the phone storage before formatting the card.

- Preinstalled apps cannot be moved. Some third-party apps you’ve downloaded and installed to the phone storage may also not allow you to move them to the storage card.

1. From the Home screen, swipe up and then tap Settings > Storage.
2. Tap Internal shared storage, and then tap Other apps if you want to move an app from the phone storage to the storage card.
   Or tap the name of your storage card, and then tap Apps if you need to move an app from the storage card back to the phone storage.
3. Tap an app you want to move.
4. Tap Change, and then tap where you want to move it to.
5. Tap Move.

Copying or moving files between the phone storage and storage card

Go to Settings to view and manage files on the phone storage and storage card. If you’re using your storage card as removable storage, you can copy or move your files between the phone storage and storage card. You can also copy or move files to or from an external USB storage device when you have it connected to HTC U11 life.

1. From the Home screen, swipe up and then tap Settings > Storage.
2. Tap Internal shared storage then tap Files, or tap the storage card name.
   Or tap the external USB storage device if you have one connected.
3. Open the folder that contains the files you want to copy or move.
4. To select or deselect files:
   - Press and hold a file to select it. To select more files, tap each file.
   - Tap a file to deselect it.
   - To select all files, tap > Select all.

5. Tap , and then tap Copy to or Move to.

6. Tap to open the slideout menu, and then choose the type of storage where to copy or move to, and then open the destination folder.

7. Tap Copy or Move.

Copying files between HTC U11 life and your computer

You can copy your music, photos, and other files to HTC U11 life.

- Save and close your files before copying them from your computer to HTC U11 life, or vice versa.
- If you’re using your storage card as internal storage, your computer will only show storage card content.

1. Connect HTC U11 life to the computer using the supplied USB Type-C cable.
2. On HTC U11 life, unlock the screen if it’s locked.
3. On the pop-up message that asks whether to use USB for file transfers, tap Yes.
   - If you don’t see this message, slide the Notifications panel open, tap the Use USB for notification, and then tap Transfer files.
   - You’ll then see options for viewing or importing files on the computer screen.
4. Choose to view files.
5. Copy the files from your computer to HTC U11 life, or vice versa.
6. After copying the files, disconnect HTC U11 life from the computer.
Unmounting the storage card

When you need to remove the storage card while HTC U11 life is on, unmount the storage card first to prevent corrupting or damaging the files in the storage card.

If your storage card is used as internal storage and there are apps that were moved to the card, you will not be able to open these apps after unmounting the card.

1. From the Home screen, swipe up and then tap **Settings > Storage**.

2. Do one of the following:
   - If your storage card appears under Portable storage, tap 📀 > Eject.
   - If your storage card appears under Device storage, tap the card name, and then tap ⚪ > Eject.
Backup and reset

Ways of backing up files, data, and settings

Worried that you might lose important stuff on HTC U11 life? Back up HTC U11 life before you remove content from the storage, do a factory reset, or upgrade to a new phone.

Cloud backup
Use your Google Account to automatically back up app data and settings including Wi-Fi passwords to Google Drive™. See Backing up HTC U11 life on page 118.

Use Google Photos to automatically back up your photos and videos.

HTC Sync Manager
Use HTC Sync Manager to import music, photos, and videos from HTC U11 life to your computer. You can also sync locally stored contacts and playlists between HTC U11 life and your computer.

Likewise, HTC Sync Manager is a good alternative if you don’t want to back up your accounts, settings, and other personal content to the cloud. You can use it to create backups of HTC U11 life on your computer.

Other backup options
If you want, you can separately back up your data or files.

Some apps allow you to back up data to the storage card—if it’s used as removable storage—so you can easily restore them after a factory reset. Just make sure not to erase the storage card when you do a factory reset.

In certain apps, you may be able to use the phone storage for backing up and restoring app data. If an app is causing some problem and you need to clear its data to try resolving the problem, back up the app data to the phone storage first.

| Messages | Back up your text messages to the storage card or phone storage, or save them as an email attachment. |
| Contacts | ▪ Save contacts and other personal data to your online accounts so you can just sync them when switching to another phone.  
▪ If you have locally stored contacts in the People app, export them to the storage card or phone storage. |
| Files | Connect HTC U11 life to your computer as a disk drive to manually copy and paste files to your computer. |
| Other data | Check other apps to see if they support exporting data to the storage card or phone storage. |
Back up HTC U11 life

Automatically back up HTC U11 life to Google Drive so you can restore content such as app data and settings after a factory reset or when restoring your data on another HTC phone.

1. From the Home screen, swipe up and then tap **Settings > Backup & reset**.

2. Tap **Backup up my data**.

3. Tap the **On/Off** switch to turn it on, and then press ⌘.

4. Make sure **Automatic restore** is turned on.

   This allows an app’s data and settings to be restored when you reinstall the app on HTC U11 life.

To select a backup account other than your primary Google Account, tap **Backup account** and then select another Google Account. You can also tap **Add account** to add a new Google Account for your backup.

**What types of data can be backed up?**

On phones running Android 8, these are the items that can be backed up using your Google Account:

<table>
<thead>
<tr>
<th>Home screen</th>
<th>Wallpaper</th>
</tr>
</thead>
</table>
| App list    | ‧ Apps installed through Google Play Store.  
              ‧ App screen’s grid size, sort order, and app folders you created in Custom view. |

| App data and settings | ‧ SMS text messages.  
                        ‧ Call history.  
                        ‧ Google Calendar™ and Gmail™ settings.  
                        ‧ Data that’s synced to your Google Account such as Google contacts and calendar events.  
                        ‧ Data in HTC apps, such as contacts in the People app that you saved on the phone, Clock and Weather city list, and email accounts in the Mail app.  
                        ‧ Data and settings in third-party apps you installed, depending on whether these apps allow this. |

| Device settings | Ringtones, Wi-Fi networks and their passwords, and certain device settings. |

Auto Backup periodically backs up your phone to a private folder in Google Drive. It occurs every 24 hours when the phone is idle, charging, and connected to a Wi-Fi network.

Backup data will not count towards your Google Drive storage quota. Large files or files that app developers have chosen to exclude from the service will not be backed up.

Restoring your wallpaper from your old phone may depend on screen resolution compatibility of both your old phone and HTC U11 life.
Restoring from your previous HTC phone

If you were using HTC Backup on your previous HTC phone, you need to download and use the HTC Restore app on HTC U11 life to restore your backup.

Depending on the amount of content, restoring a backup to HTC U11 life through your data connection may incur additional data costs and take a long time. Using a Wi-Fi connection is recommended.

1. After you’ve finished setting up HTC U11 life, slide the Notifications panel open, and then tap the Transfer or restore your content notification.
   If you don’t see this notification, go to Settings and then tap Backup & reset.
2. Tap Restore from HTC backup.
   If the HTC Restore app is not installed on the phone, you’ll be prompted to download and install HTC Restore.
3. Tap Restore from HTC backup.
4. Sign in with the account you used to back up your old phone.
5. Choose the backup to restore to HTC U11 life.
6. If prompted, choose whether to use a mobile data or Wi-Fi connection for restoring your backup.
7. Follow the onscreen instructions to restore your backup.
8. Slide open the Notifications panel to check if there’s any notification to finish restoring your backup.

Free apps from Google Play Store will be restored in the background, and you can track the progress via a notification in the status bar. To restore paid apps, you need to download and install them from Google Play Store.

Your apps will appear on the Apps screen as they are installed. The Apps and Home screen shortcuts will be reorganized as in your backup after all of your apps have been installed. You can continue using HTC U11 life while apps are being restored.

Backing up contacts and messages

If you want to separately back up contacts and text messages on HTC U11 life, here are some tips on how to export or import them.

Backing up your contacts

1. From the Home screen, tap , and then find and tap People.
2. On the People tab, tap  > Manage contacts.
3. Tap Import/Export contacts > Export to phone storage or Export to SD card.
4. Select an account or type of contacts to export.
5. To help protect your data, tap Yes, and then set a password for this backup. Be sure to remember this password. You’ll need to enter it again when importing contacts.

If you don’t need a password, tap No.

6. Tap OK.

Restoring contacts

1. On the People tab, tap Manage contacts.

2. Tap Import/Export contacts > Import from phone storage or Import from SD card.

3. If you have more than one account set up, tap the type for the imported contacts.

4. If you have multiple backups available, select the backup you want to import, and then tap OK.

5. Enter the password you’ve set for this backup, and then tap OK.

Backing up your text messages

Keep important text messages by backing them up so you can restore them to the HTC Messages app, if needed. The Messages app backs up either to the phone storage or to your storage card if you have one inserted.

Text messages in the secure box and blocked messages will not be backed up. To include such messages to your backup, move them first to the general message box.

1. From the Home screen, tap Messages, and then find and tap Messages.

2. Tap Back up/Restore SMS > Back up > Back up SMS.

3. To help protect your data, set a password for your backup. Be sure to remember this password. You’ll need to enter it again when restoring messages.

If you don’t need a password, select Do not password protect this backup.

4. Enter a name for your backup file, and then tap OK.

Backing up text messages by email

- You need to set up your email account in the HTC Mail app.
- Text messages in the secure box and blocked messages will not be backed up. To include such messages to your backup, move them first to the general message box.

1. From the Home screen, tap Messages, and then find and tap Messages.

2. Tap Back up/Restore SMS.

3. Tap Back up > Back up SMS via mail.
4. To help protect your data, set a password for your backup. Be sure to remember this password. You’ll need to enter it again when restoring messages.

   If you don’t need a password, select Do not password protect this backup.

5. Enter your email address.

6. Compose your email message, and then send it.

---

**Restoring text messages**

1. From the Home screen, tap 📱, and then find and tap Messages.

2. Tap ⚙️ > Back up/Restore SMS > Restore.

3. Choose how you want to restore the messages, and tap Next.

4. Tap the backup to import.

5. Enter the password you’ve set for this backup. If you didn’t set a password, select This backup file is not password protected.

6. Tap OK.

To restore text messages that were backed up via email, open the email message with the backup file attachment from the Mail app. Tap the attachment to download it first, and then tap it again to open the backup file to import. Enter the password you’ve set for this backup or select This backup file is not password protected.

---

**Resetting network settings**

Reset the network settings when you’re having problems connecting HTC U11 life to your mobile data or Wi-Fi network and Bluetooth devices.

1. From the Home screen, swipe up and then tap Settings > Backup & reset.

2. Tap Network settings reset.

3. Tap Reset settings.

4. Tap Reset settings.
Resetting HTC U11 life (Hard reset)

If HTC U11 life has a persistent problem that cannot be solved, you can perform a factory reset (also called a hard reset or master reset). A factory reset reverts the phone back to its initial state—the state before you turned on the phone for the first time.

Factory reset will remove all data on your phone storage, including apps you've downloaded and installed, your accounts, your files, as well as system and app data and settings. Be sure to back up any data and files you want to keep before you do a factory reset.

1. From the Home screen, swipe up and then tap **Settings > Backup & reset**.
2. Tap **Factory data reset**.
   
   To avoid deleting media and other data from your storage card, make sure you do not select the **Erase SD card** option.
3. Tap **Reset Phone**.
4. Tap **Erase Everything**.

A factory reset may not permanently erase all data from your phone, including personal information.
Transfer

Ways of transferring content from your previous phone

Depending on the operating system in your old phone, choose the proper method of transferring content to HTC U11 life.

**From an Android phone**

On your old HTC or other Android phone, download the HTC Transfer Tool and use it to transfer your content to HTC U11 life. See Transferring content from an Android phone on page 123.

**From an iPhone**

Back up iPhone® content to your iCloud® storage, and then transfer the content to HTC U11 life. See Transferring iPhone content through iCloud on page 124.

Transferring content from an Android phone

On your old Android phone, download the HTC Transfer Tool and use it to transfer your content to HTC U11 life.

The types of locally stored content on your old phone that the HTC Transfer Tool can transfer include contacts, messages, music, photos, videos, and some settings. More types of data such as call histories, email accounts, and some HTC app settings can be transferred from HTC phones that have HTC Sense® 5.5 or higher.

You need Android version 2.2 or later to use the HTC Transfer Tool on your old phone.

1. From the Home screen, swipe up and then tap **Settings > Get content from another phone**.
2. Choose whether to transfer from an HTC Android phone or other Android phone.
3. On the Get content from another phone screen, tap **Next**.
4. Follow the steps shown on HTC U11 life to download the HTC Transfer Tool from Google Play Store to your old phone, install it, and open the tool.
5. When you see a PIN on your old phone, make sure the same PIN also appears on HTC U11 life before you continue.
   
   If the PIN code doesn’t appear, tap **Retry** on your old phone. If it still won’t appear, this may mean that your old phone is unable to connect to HTC U11 life. When this happens, try another transfer method.
6. Tap **Confirm** on your old phone.
7. On your old phone, choose the types of content you want to transfer, tap **Transfer**, and then tap **Yes**.

8. Wait for the transfer to finish.

9. Tap **Done** on both phones.

### Transferring iPhone content through iCloud

If you have an iCloud account, sync iPhone content to your iCloud storage, and then transfer content such as contacts or photos to HTC U11 life.

1. From the Home screen, swipe up and then tap **Settings > Get content from another phone**.
2. Tap **iPhone > Import from iCloud backup**.
3. Follow the steps shown onscreen to back up your iPhone content to your iCloud storage.
4. Enter your iCloud email address and password, and then tap **Sign in**.
5. Choose the iPhone backup that you want to transfer to HTC U11 life, and then tap **Next**.
6. Choose the types of content you want to transfer, and then tap **Import**.
7. Wait for the transfer to finish, and then tap **Done**.

Only some contact details can be transferred, such as the contact name, photo, postal address, email address, birthdate, anniversary date, and notes.

### Other ways of getting contacts and other content

There are different ways you can individually add contacts and other content to HTC U11 life.

<table>
<thead>
<tr>

Transferring photos, videos, and music between your phone and computer

Here are ways you can transfer your media from or to your computer.

- Connect HTC U11 life to your computer. Your computer will recognize it just like any removable USB drive, and you can copy your media between them. See Copying files between HTC U11 life and your computer on page 115.

- Download and use the HTC Sync Manager software on your computer. You can set it up to automatically get music, photos, and videos off HTC U11 life to your computer. You can also sync playlists from your computer to the phone.

  If you have an iPhone, you can also connect it and transfer camera roll photos to your computer using HTC Sync Manager. Then reconnect HTC U11 life and copy them over.

  See the HTC Sync Manager help or user guide for details.

- Use cloud storage services to put your media in one place so you can manage them anywhere—on your computer, HTC U11 life, and other mobile devices.
Installing and removing apps

Getting apps from Google Play Store

Google Play Store is the place to go to find new apps for HTC U11 life. Choose from a wide variety of free and paid apps ranging from productivity apps, entertainment, to games.

To purchase apps and other content on Google Play Store, you can use the payment methods from your Google account. When you make your first purchase, your selected payment method will be added to your Google account. To learn more about accepted payment methods, see support.google.com.

Finding and installing an app

When you install apps and use them on HTC U11 life, they may require access to your personal information or access to certain functions or settings. Download and install only apps that you trust.

Be cautious when downloading apps that have access to functions or a significant amount of your data on HTC U11 life. You’re responsible for the results of using downloaded apps.

1. On the Home screen, swipe up and then find and tap Play Store.
2. Tap the search bar and enter the app name you’re looking for.
3. When you see the app in the search results list, tap it and read its description and user reviews.
4. Do one of the following:
   - To install a free app, tap Install.
   - To install a paid app, tap the price button. If you have not added a payment method to your Google Account, tap ✉️ to select the payment method, and then tap Continue.

To open the app, tap Open after installing or go to the Apps screen and tap the app.

Apps sometimes get updated with improvements or bug fixes. By default, updates are automatically downloaded when your phone is connected to a Wi-Fi network. In the Google Play Store app settings, you can turn auto-update off. See Installing app updates from Google Play Store on page 61.
Restoring apps from Google Play Store

Upgraded to a new phone, replaced a lost one, or performed a factory reset? Restore apps that you previously downloaded.

1. On the Home screen, swipe up and then find and tap Play Store.
2. Tap  to open the slideout menu.
3. Tap My apps & games and swipe to the Library tab.
4. Tap Install next to the app you want to restore.

For more details, refer to the Google Play Store help.

Downloading apps from the web

You can download apps directly from websites.

Apps downloaded from websites can be from unknown sources. To help protect HTC U11 life and your personal data, we strongly recommend that you only download from websites you trust.

1. Open the browser, and then go to the website where you can download the app you want.
2. Open the downloaded app and if prompted, tap Settings, and then turn on Allow from this source.
3. Follow the onscreen instructions to install and open the app.

To review installation permissions for installed apps, go to Settings > Apps, and then tap  > Configure apps > Special app access > Install unknown apps. Tap the app, and then enable or disable the Allow from this source option.

Uninstalling an app

If you no longer need an app that you’ve downloaded and installed, you can uninstall it.

Most of the preloaded apps cannot be uninstalled.

From the Apps screen, press and hold the app you want to remove, and then drag it to Uninstall.

If you purchased an app in Play Store, you can uninstall it for a refund within a limited time. To know more about the refund policy for paid apps, refer to the Google Play Store help.
Working with apps

Accessing your apps

There are two easy ways to access your app list.

- Swipe up on the Home screen.
- Tap ☰ on the HTC BlinkFeed or Home screen.

Arranging apps

You can arrange and rearrange the apps on the Apps screen.

1. From HTC BlinkFeed or any widget panel, tap ☰.
2. Tap ☰, and then choose how to arrange apps, such as alphabetically.
3. Select Custom if you want to rearrange or group apps into folders.

Showing or hiding apps in the Apps screen

1. On the Apps screen, tap ☰ > Show/hide apps.
2. Select the apps you want to hide, or clear their check boxes to unhide them.
3. Tap Done.

Grouping apps into a folder

1. On the Apps screen, tap ☰ > Custom.
2. Tap ☰ > Rearrange apps.
3. Press and hold an app, and then drag it over to another app to automatically create a folder.
4. To add more apps, drag each app over to the folder.
5. To name the folder, open the folder, tap its title bar, and then enter a folder name.
6. When you’re done, tap ✓.

Moving apps and folders

1. On the Apps screen, tap ☰ > Custom.
2. Tap ☰ > Rearrange apps.
3. Press and hold an app or folder, and then do one of the following:
   - Drag the app or folder to another position on the same page. Wait until you see the occupying icon move away before releasing your finger.
   - Drag the app or folder to the \( \Rightarrow \) or \( \Rightarrow \Rightarrow \) arrow to move it to another page.

4. When you’re done, tap \( \checkmark \).

---

### Removing apps from a folder

1. On the Apps screen, tap \( \diamondsuit \) → Custom.
2. Tap \( \bigoplus \) → Rearrange apps.
3. Tap the folder to open it.
4. Press and hold an app, and then drag it out to the Apps screen. Wait until you see the occupying icon move away before releasing your finger.
5. When you’re done, tap \( \checkmark \).

---

### App shortcuts

Starting from Android 7.1, press and hold an app icon on a widget panel or the Apps screen to display a menu that lets you quickly access common app functions.

Not all apps support the app shortcuts feature.

1. Press and hold an app icon, for example Clock.
2. From the displayed menu, tap the function you want to launch in the app.
Switching between recently opened apps

When using different apps on your phone, you can easily switch between the apps you’ve recently opened.

Press □ to see your recently-opened apps.

- To go back to an app, flip through the cards to find the app and tap it.
- To remove an app, drag it left or right.
- To remove all of the apps, tap Clear all.

Or, press □ twice to quickly switch between two most recently used apps.

Working with two apps at the same time

Some apps may not support this feature.

1. Open the first app you want to use, and then press and hold □. A screen divider will appear onscreen.

2. Do one of the following:
   - If the app you want to use is in the recent apps list, tap it to make it the second active app.
   - Press HOME, and then open the app you want to use as the second active app.

To turn off the split-screen view, drag the handle of the screen divider to the top or bottom edge of the screen.
Using picture-in-picture

Keep a small window of the video you’re watching or a supported app onscreen while you do other things on the phone.

Not all apps support picture-in-picture.

1. Open a supported app, such as a video player or video call app, and start the video. Display the video in full screen.
2. Press HOME.
   The video continues to play in a small window at the bottom-right corner of the screen.
3. While viewing the video, you can do other things at the same time, such as use another app.
4. Drag the small window to move it to another position.
   Double-tap the window to display the video in full screen again.

How do I check whether an app supports picture-in-picture?

The app info will show the picture-in-picture option if the app supports it.

1. Press and hold the app icon, and then tap ☰.
2. On the App info screen, check if there’s the Picture-in-picture option. It is enabled by default.

To turn this feature on or off, tap Picture-in-picture, and then tap the Allow picture-in-picture On/Off switch.

To check which apps on your phone support picture-in-picture, go to Settings > Apps, tap ☰ > Configure apps > Special app access > Picture-in-picture.
Controlling app permissions

When you open apps the first time, you’ll be prompted to grant them permissions to access certain data or features, such as contacts or the microphone. This gives you more control over which apps have authorized access.

- If you suspect a certain app of being malicious or requesting unnecessary permissions, you should choose Deny to protect your phone.
- If you choose Deny in a trusted app, you may not be able to use the app or access its full functionality. When this happens, go to Settings to change the app permissions.

1. From the Home screen, swipe up and then tap Settings > Apps.
2. Tap ☰ > Configure apps > App permissions, and then tap the data type or feature to choose which apps can access it.
3. Turn on the On/Off switch of the app to let it access the data or feature.

To change the types of data that an app can have access to, press and hold the app on the Home screen or Apps screen, tap ☰, and then tap Permissions.

Setting default apps

In Settings, you can choose default apps for web browsing, text messaging, and more.

1. From the Home screen, swipe up and then tap Settings > Apps.
2. Tap ☰ > Configure apps.
3. Under Default, choose your default launcher, web browser, phone, text messaging apps, and more.

Setting up app links

If there’s more than one app that can be opened when you tap a link—such as a shared social post or media link—you may be prompted to choose the app you want to use. When you’re prompted after you’ve tapped a link, select an app, and then tap Always to set that app as the default app to use.

You can also go to Settings to see how app links have been set up for different apps and change them.

1. From the Home screen, swipe up and then tap Settings > Apps.
2. Tap ☰ > Configure apps > Opening links.
3. Tap the app you want to configure, and then tap Open supported links.
4. Select Open in this app to always open the app without being prompted when you tap a link.

You can also choose whether to always be prompted to choose the app or never use the app for opening links.
Disabling an app

Apps, even if not used often, may be running in the background and downloading data. If an app cannot be uninstalled, you can disable it.

1. From the Home screen, swipe up and then tap Settings > Apps.
2. Tap the app, and then tap Disable.

You can also press and hold an app on the Home screen or Apps screen, tap Delete, and then tap Disable.
What is HTC Sense Companion?

HTC Sense Companion is a personal companion that’s always learning from you, and the things you do every day. Learn more about what HTC Sense Companion can do for you by going to http://www.htc.com/support/apps/sense-companion/.

- HTC Sense Companion retrieves information from third party websites and databases. HTC is not responsible for the accuracy of such third party content.
- To regularly receive suggestions and reminders in HTC Sense Companion, your phone must be connected to the Internet. It’s recommended to keep your mobile data or Wi-Fi connection always on.
- More features will be added through an HTC system update or app update.
HTC BlinkFeed

Get the latest news about your interests with HTC BlinkFeed. Choose which sources, such as social media or news, show up on your feed. Learn more about HTC Blinkfeed by going to [http://www.htc.com/support/apps/blinkfeed/](http://www.htc.com/support/apps/blinkfeed/).

HTC Themes

Themes brings a quick and easy way for you to customize your phone with elements such as wallpapers, sounds, and icons. Learn more about Themes by going to [http://www.htc.com/support/apps/themes](http://www.htc.com/support/apps/themes).

Boost+

Use Boost+ to tune your phone’s performance, improve battery consumption, clear junk files, and manage the apps on the phone. Learn more about Boost+ by going to [http://www.htc.com/support/apps/boost-plus/](http://www.htc.com/support/apps/boost-plus/).

Mail

The Mail app is where you read, send, and organize email messages from one or more email accounts that you’ve set up on your phone. Learn more about Mail by going to [http://www.htc.com/support/apps/mail/](http://www.htc.com/support/apps/mail/).

Weather

Use the Weather app and widget to check the current weather and weather forecasts for the next few days. Learn more about Weather by going to [http://www.htc.com/support/apps/weather/](http://www.htc.com/support/apps/weather/).

Clock

Get more from the Clock app than just the regular date and time. Use your phone to also check the times around the world, set an alarm, and even use it as a stopwatch. Learn more about Clock by going to [http://www.htc.com/support/apps/clock/](http://www.htc.com/support/apps/clock/).

Voice Recorder

Use Voice Recorder to capture information during lectures, interviews, or even to create your own audio log.

1. From the Home screen, tap 🎤, and then find and tap Voice Recorder.
2. Hold the microphone near the sound source.
3. Tap 🎤 to start recording a voice clip.

Voice Recorder can run in the background while you do other things on HTC U11 life, except when you open other apps that also use audio functions.

4. Tap ■ to stop recording.

To play back the voice clip, tap ▶.

To see your recorded voice clips, tap ◀️. Press and hold a voice clip to see options for sharing, setting it as a ringtone, and more.

---

Enabling high resolution audio recording

Want to make crystal clear recordings? Record sounds in high resolution audio.

1. From the Home screen, tap 😁, and then find and tap Voice Recorder.

2. Tap ⚙️ > Settings > Encoding format, and select High res quality (FLAC).
Internet connections

Turning the data connection on or off

Turning your data connection off saves battery life and money on data charges.

1. Open the full Quick Settings panel. See Using Quick Settings on page 39.
2. Tap the Mobile data tile to turn the data connection on and off.

If you do not see the Mobile data tile on the Quick Settings panel, swipe left to see more tiles.

If you don’t have the data connection turned on and you’re also not connected to a Wi-Fi network, you won’t receive automatic updates to your email, social network accounts, and other synced information.

Managing your data usage

If you’re on a limited data allowance, it’s important to keep track of the activities and apps that usually send and receive data, such as browsing the web, syncing online accounts, and sending email or sharing status updates.

Here are some other examples:

- Streaming web videos and music
- Playing online games
- Downloading apps, maps, and files
- Refreshing apps to update info and feeds
- Uploading and backing up your files to your online storage account
- Using HTC U11 life as a Wi-Fi hotspot
- Sharing your mobile data connection by USB tethering

To help you save on data usage, connect to a Wi-Fi network whenever possible and set your online accounts and emails to sync less frequently.
**Data Saver**

Data Saver helps you limit cellular data costs by restricting background data usage. You can also set applications to always have access to a data connection—such as your email app—to be ignored by Data Saver.

1. From the Home screen, swipe up and then find and tap **Settings**.
2. Tap **More > Data usage**.
3. Tap **Data saver** and then tap the **On/Off** switch to turn it on or off.
4. Tap **Unrestricted data access**, and then tap the **On/Off** switch next to those apps that you want to still have access to data connection even if Data Saver is turned on.

**Turning data roaming on or off**

Connect to your mobile operator’s partner networks and access data services when you’re out of your mobile operator’s coverage area.

> Using data services while roaming may be costly. Check with your mobile operator for data roaming rates before you use data roaming.

1. From the Home screen, swipe up and then find and tap **Settings**.
2. Tap **Mobile network**.
3. Tap **Data roaming** to turn it on or off.

**Keeping track of your data usage**

Monitor your data usage to help prevent going over your monthly data allowance.

> Data usage measured by HTC U11 life may differ from, and be less than, your actual data usage.

1. From the Home screen, swipe up and then find and tap **Settings**.
2. Tap **More > Data usage**.

   At the top you’ll see a bar that displays the data usage to date, and the data usage cycle, alert, warning, and limit, if one has been set.

3. With Mobile data turned on, tap **Mobile data usage > 📈**.
4. Tap **Billing cycle**, and then set the day of the month when your usage cycle resets. This date is usually the start of your monthly billing cycle.
5. Tap the Set data warning **On/Off** switch to turn it on and then tap **Data warning** to enter the amount of data usage at which you’ll be alerted before you reach your monthly data limit. Tap ▼ to change the unit.
6. Tap the Set data limit **On/Off** switch to turn it on and then tap **Data limit** to enter the set data usage at which your data connection will automatically be disabled. Tap ▼ to change the unit.
Viewing the data usage of apps

1. From the Home screen, swipe up and then find and tap Settings.
2. Tap More > Data usage.
3. Tap Mobile data usage.
4. Scroll down the screen to see a list of apps and their data usage info.
5. Tap an app to see more details.

Wi-Fi connection

To use Wi-Fi, you need access to a wireless access point or “hotspot”.

- The availability and strength of a Wi-Fi signal varies depending on objects the Wi-Fi signal has to pass through (such as buildings or a wall between rooms).

Turning Wi-Fi on or off

1. From the Home screen, swipe up and then find and tap Settings.
2. Tap the Wi-Fi On/Off switch to turn Wi-Fi on or off.
3. Tap Wi-Fi to see a list of detected wireless networks.

- Scroll down to the bottom of the screen to see Saved networks.

Connecting to a Wi-Fi network

1. Turn Wi-Fi on, and check the list of detected Wi-Fi networks.
   
   See Turning Wi-Fi on or off on page 139.

2. Tap a Wi-Fi network you want to connect to.

3. If you selected a secured network, enter the network key or password.

4. Tap Connect. You’ll see the Wi-Fi icon 📡 in the status bar when connected.
Connecting to a Wi-Fi network via WPS

If you’re using a Wi-Fi router with Wi-Fi Protected Setup (WPS), you can connect HTC U11 life easily.

1. Turn Wi-Fi on, and check the list of detected Wi-Fi networks.
   See Turning Wi-Fi on or off on page 139.
2. Scroll down to the bottom of the list of available Wi-Fi networks and tap Wi-Fi preferences > Advanced > WPS Push Button.

To use the Wi-Fi Protected Setup (WPS) PIN method, tap Wi-Fi preferences > Advanced > WPS Pin Entry.

3. Press the WPS button on your Wi-Fi router.

Logging into a public Wi-Fi network automatically (WISPr)

You can set HTC U11 life to automatically log into public Wi-Fi networks that you regularly use. This saves you the trouble of going through the Wi-Fi provider’s web authentication every time you connect to their Wi-Fi network. Just add your login credentials to the WISPr (Wireless Internet Service Provider roaming) settings.

1. From the Home screen, swipe up and then find and tap Settings.
2. If Wi-Fi connection is off, tap the Wi-Fi On/Off switch to turn it on.
3. Tap Wi-Fi.
4. Scroll down to the bottom of the screen and tap Wi-Fi preferences > Advanced.
5. Under WISPr settings, tap the Auto login On/Off switch to turn it on.
6. Tap WISPr account settings > Add a new account.
7. Enter the service provider name, your login name (the full domain name), and password.
8. Tap : > Save. If you have access to several public Wi-Fi networks, you can add more accounts.
9. Connect to the public Wi-Fi network.

In the WISPr accounts list, press and hold an account to remove or edit it.

Connecting to VPN

Add virtual private networks (VPNs) so you can connect and access resources inside a local network, such as your corporate or home network.

Before you can connect HTC U11 life to your local network, you may be asked to:
- Install security certificates.
- Enter your login credentials.
- Download and install a required VPN app, if you're connecting to a secured enterprise network. Contact your network administrator for details.

Also, HTC U11 life must first establish a Wi-Fi or data connection before you can start a VPN connection.

---

### Adding a VPN connection

You must first set a lock screen PIN, password, or pattern before you can use credential storage and set up the VPN.

1. From the Home screen, swipe up and then find and tap **Settings**.
2. Tap **More > VPN**, and then tap ➕.
3. Enter the VPN settings and set them up according to the security details your network administrator gave you.
4. Tap **Save**.

---

### Connecting to a VPN

1. From the Home screen, swipe up and then find and tap **Settings**.
2. Tap **More > VPN**.
3. Tap the VPN that you want to connect to.
4. Enter your log in credentials, and then tap **Connect**. When you're connected, the VPN connected icon 🗝 appears in the notification area of the status bar.

To disconnect from a VPN connection, tap the VPN connection, and then tap **Disconnect**.

You can then open the web browser to access resources such as your corporate network intranet.
Installing a digital certificate

Use client and Certificate Authority (CA) digital certificates to enable HTC U11 life to access VPN or secured Wi-Fi networks, and also to provide authentication to online secure servers. You can get a certificate from your system administrator or download it from sites that require authentication.

- You must set a lock screen PIN or password before installing a digital certificate.
- Some apps such as your browser or email client let you install certificates directly in the app. See the app’s help for details.

1. Save the certificate file in the root folder on HTC U11 life or your storage card.
2. From the Home screen, swipe up and then tap `Settings` > `Security`.
3. Tap `Encryption & credentials` > `Install from SD card`.
4. Browse to the certificate and select it.

Tap `≡` to browse the storage card.

5. Enter a name for the certificate and select how it will be used.
6. Tap `OK`.

Using HTC U11 life as a Wi-Fi hotspot

Share your data connection with other devices by turning HTC U11 life into a Wi-Fi hotspot.

- Make sure the data connection is turned on.
- You must have an approved data plan associated with your account from your mobile service provider to use this service. Devices connected to your Wi-Fi hotspot use data from your subscribed data plan.

1. From the Home screen, swipe up and then find and tap `Settings`.
2. Tap `More` > `Hotspot & tethering` > `Portable Wi-Fi hotspot`.
   - The first time you turn on the Wi-Fi hotspot, you’ll need to set it up.
3. Enter a hotspot name or use the default.
4. Enter a password or use the default.
   - The password is the key other people need to enter on their device so they can connect and use HTC U11 life as a wireless router.
5. Tap **Manage users** to set a limit to the number of users who can connect to your Wi-Fi hotspot.

6. Tap the Portable Wi-Fi Hotspot **On/Off** switch to turn it on.

HTC U11 life is ready to be used as a Wi-Fi hotspot when you see 📱 on the status bar.

To help minimize security risks, use the default security settings and set a strong and unique password.

## Sharing your phone’s Internet connection by USB tethering

No Internet connection available for your computer? No problem. Use the data connection of HTC U11 life to connect to the Internet.

- To make sure that the USB drivers for HTC U11 life are up-to-date, install the latest version of HTC Sync Manager on your computer.
- You may need to have USB tethering added to your data plan, and it may incur additional cost. Contact your mobile service provider for details.
- Make sure that mobile data is turned on.

1. Connect HTC U11 life to your computer using the provided USB Type-C cable.
2. From the Home screen, swipe up and then find and tap **Settings**.
3. Tap **More > Hotspot & tethering > USB tethering**.
4. Tap the USB tethering **On/Off** switch to turn it on.
Wireless sharing

What is HTC Connect?

With HTC Connect, wirelessly stream music or video from your phone to your speakers or TV by just swiping up the screen with 3 fingers. Learn more about HTC Connect and which devices the phone can connect to by going to http://www.htc.com/support/apps/htc-connect/.

Turning Bluetooth on or off

1. From the Home screen, swipe up and then find and tap Settings.
2. Tap the Bluetooth On/Off switch to turn the Bluetooth connection on and off.
3. Tap Bluetooth to see a list of available devices.

Turn off Bluetooth when not in use to save battery power, or in places where using a wireless device is prohibited, such as on board an aircraft and in hospitals.

Connecting a Bluetooth headset

You can listen to music over a Bluetooth A2DP stereo headset, or have hands-free conversations using a compatible Bluetooth headset.

Before you connect your headset, make it discoverable so HTC U11 life can find it. Refer to your headset manual for details.

1. Turn Bluetooth on and check the list of available devices.
   See Turning Bluetooth on or off on page 144.
2. If you don’t see your headset listed, tap Scan for devices to refresh the list.
3. Tap the name of your headset in the Available Devices section. HTC U11 life pairs with the headset and the connection status is displayed in the Paired Devices section.
4. If prompted to enter a passcode, try 0000 or 1234, or consult the headset documentation to find the passcode.

When the Bluetooth headset is connected, you’ll see 🔊 in the status bar.
Reconnecting a Bluetooth headset

Normally, you can easily reconnect your headset by switching on Bluetooth on HTC U11 life, and then turning on the headset.

However, you might have to connect manually if your headset has been used with another Bluetooth device.

1. Turn Bluetooth on and check the list of paired devices.
   See Turning Bluetooth on or off on page 144.
2. Tap the headset’s name in the Paired Devices section.
3. If prompted to enter a passcode, try 0000 or 1234, or consult the headset documentation to find the passcode.

If you still cannot reconnect to the headset, follow the instructions in Unpairing from a Bluetooth device on page 145, and then follow the steps under Connecting a Bluetooth headset on page 144.

Unpairing from a Bluetooth device

1. Turn Bluetooth on and check the list of paired devices.
   See Turning Bluetooth on or off on page 144.
2. In the Paired devices section, tap ☑ next to the device to unpair.
3. Tap Unpair.

Receiving files using Bluetooth

HTC U11 life lets you receive various files with Bluetooth including photos, contact info, and documents such as PDFs.

Refer to the device’s documentation for instructions on sending information over Bluetooth.

1. Turn Bluetooth on.
   See Turning Bluetooth on or off on page 144.
2. On the sending device, send one or more files to HTC U11 life.
3. If asked, accept the pairing request on HTC U11 life and on the sending device. You may also be prompted to enter the same passcode or confirm the auto-generated passcode on both devices.
   You’ll then get a Bluetooth authorization request.
4. Tap Pair.
5. When HTC U11 life receives a file transfer request notification, slide the Notifications panel down, tap the incoming file notification, and then tap Accept.
6. When a file is transferred, a notification is displayed. Slide the Notifications panel down, and then tap the relevant notification.

7. Tap the received file to view it.

**Using NFC**

With built-in NFC (near field communication) on HTC U11 life, you can share content to another NFC-capable mobile device in an instant.

The availability of NFC varies by phone model, region, and country.

Beam webpages, photos, contact information, and more by holding HTC U11 life and the other device back to back.

You must turn NFC on to use Android Pay™. For details about Android Pay, see [android.com/pay](http://android.com/pay).

**Turning NFC on or off**

1. From the Home screen, swipe up and then find and tap **Settings**.
2. Tap **More**, and then tap the NFC **On/Off** switch to turn it on and off.
Make sure that both devices are unlocked and have NFC turned on. If the other device has an Android Beam ™ option, make sure it is also turned on.

1. While viewing the content that you want to share, hold HTC U11 life and the other phone back to back.

   Make sure that the NFC area (shaded part) of HTC U11 life and the other phone's NFC area are close to one another. Experiment by slightly moving the phones until a connection is made.

2. When HTC U11 life vibrates, tap the screen to send the content to the other device.

   The shared content appears on the other screen. For some items that you've shared (such as contact information), additional instructions on how to save the item will appear on the receiving device.
Common settings

Do not disturb mode

Use Do not disturb mode to reject calls, and silence audible alerts and notifications, but still keep a data connection available.

1. With two fingers, swipe down from the top of the screen to open Quick Settings.

2. Tap . If necessary, swipe to the next screen.

3. Tap Total silence, Alarms only, or Priority only depending on if you want to allow exceptions. When Priority only is selected, you can receive messages or calls from contacts in your exceptions list.

4. Tap Until you turn off Do Not Disturb if you want to turn off Do not disturb by yourself or tap or to set the number of hours before Do not disturb turns off automatically.

5. Tap Done to activate it.

The Do not disturb icon will appear in the status bar.

You can also tap More settings and then select Auto decline incoming calls to decline incoming calls and have them sent to voicemail.

- When the screen is on, press VOLUME and then tap Turn off now to turn off Do not disturb mode quickly.
- When you press VOLUME down until you reach silence mode, Do not disturb Alarms only mode is activated.

When Do not disturb is on, the notification LED will not flash.
### Blocking visual disturbances

You can set Do not disturb mode to block visual disturbances such as pop up notifications.

1. From the Home screen, swipe up and then tap **Settings > Sound & notification**.
2. Tap **Do Not Disturb preferences > Block visual disturbances**.
3. Tap the On/Off switches to choose whether to block visual disturbances when the screen is on and off.

### Allowing notifications and contacts to bypass Do not disturb mode

Add important contacts to an exceptions list so you can still receive their calls and messages even when Do not disturb mode is on.

1. From the Home screen, swipe up and then tap **Settings > Sound & notification**.
2. Tap **Do Not Disturb preferences > Priority only allows**.
3. Tap the On/Off switch next to the items you wish to allow.
4. Tap **Messages** or **Calls** to select who can contact you.
5. Tap **Manage approved contacts**, and then tap ☐ to add contacts to your exceptions list.
   
   To remove contacts or numbers from the list, tap ✗ > **Remove contacts**.

### Setting a Do not disturb schedule

Schedule Do not disturb to turn on automatically and how long will it last. For example, you can set it to turn on during a weekly meeting.

1. From the Home screen, swipe up and then tap **Settings > Sound & notification**.
2. Tap **Do Not Disturb preferences**.
3. Tap **Add more**.
4. Select whether to base the rule on a time or an event, enter a name for the rule, and then tap **OK**.
5. Set the rule’s parameters.

<table>
<thead>
<tr>
<th>Rule</th>
<th>Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Time rule</strong></td>
<td>- Set the days.</td>
</tr>
<tr>
<td></td>
<td>- Set the start and end times.</td>
</tr>
<tr>
<td></td>
<td>- Select a Do Not Disturb preferences level.</td>
</tr>
</tbody>
</table>

You can also choose whether to allow the rule to stop at either the rule end time or by the next alarm you’ve set in the Clock app.
### Location settings

Some apps use your location to provide information that you need. Choose a location mode to use based on how accurate you want these apps to determine your location.

1. From the Home screen, swipe up and then tap **Settings > Location**.
2. If the **On/Off** switch is off, tap it to turn on location mode.
3. Tap **Mode**, and then select one of the following location modes:
   - **High accuracy** provides a better estimate of your location. It relies on GPS, Wi-Fi, Bluetooth, or mobile networks to determine your location. This mode uses Google location services.
   - **Battery saving** relies on Wi-Fi, Bluetooth, or mobile networks without using GPS to consume lesser battery power. This mode uses Google location services.
   - **Device only** uses GPS.

Turning off a location source (for example GPS) means no applications on HTC U11 life will collect your location data through that location source. However, third party applications may collect — and HTC U11 life may continue to provide — location data through other sources, including through Wi-Fi and signal triangulation.
Airplane mode

When you enable Airplane (Flight) mode, all wireless radios on HTC U11 life are turned off, including the call function, data services, Bluetooth, and Wi-Fi.

When you disable Airplane mode, the call function is turned back on and the previous state of Bluetooth and Wi-Fi is restored.

- You can manually turn Bluetooth and Wi-Fi back on after enabling Airplane mode.
- If USB tethering is turned on, enabling Airplane mode turns it off. You need to manually turn USB tethering on after you disable Airplane mode.

Do any of the following to turn Airplane mode on or off:

- Press and hold POWER, and then tap Airplane mode.
- With two fingers, swipe down from the status bar to open the Quick Settings panel. Tap the Airplane mode tile to turn airplane mode on or off.

When enabled, the Airplane mode icon is displayed in the status bar.

Automatic screen rotation

Automatic rotation is not supported in all applications.

1. With two fingers, swipe down from the status bar to open the Quick Settings panel.
2. Tap the Auto-rotate / Portrait tile to toggle between the two modes.

Setting when to turn off the screen

After a period of inactivity, the screen turns off to conserve battery power. You can set the idle time before the screen turns off.

1. From the Home screen, swipe up and then tap Settings > Display, gestures & buttons.
2. Tap Screen timeout, and then tap the time before the screen turns off.
Screen brightness

Screen brightness level can be automatically adjusted or manually set.

1. From the Home screen, swipe up and then tap Settings > Display, gestures & buttons.
2. Use Automatic brightness to automatically adjust the screen brightness depending on your lighting environment. This feature is turned on by default.
   If you want to manually set the screen brightness, tap the Automatic brightness On/Off switch to turn it off.
3. Tap Brightness level, and then drag the slider.
   This sets the maximum brightness level for Automatic brightness if this feature is turned on, or allows you to manually set the screen brightness if the feature is turned off.

Night mode

Adjust the screen from blue to a warmer color to help reduce eye strain when viewing it at night.

1. From the Home screen, swipe up and then tap Settings > Display, gestures & buttons.
2. Tap Night mode, and then tap its On/Off switch to turn this feature on.
3. Drag the slider to adjust the color temperature. Dragging the Intensity slider to the right filters out more blue light.
4. Tap Turn on automatically to set a schedule when to turn on the feature.
5. After you’ve set a schedule, tap the On/Off switch to turn it off. Your phone will then follow the schedule you’ve set.

Adjusting the display size

Resize items and fonts on the screen to make them easier to see.

1. From the Home screen, swipe up and then tap Settings > Display, gestures & buttons.
2. Tap Display size.
3. Tap + or −, or drag the slider to increase or decrease the size of fonts or items on the screen.

Swipe left or right above Preview to see the actual look of your selected display size.
Touch sounds and vibration

Some people like the sound or vibration feedback they get when touching the screen, and some don’t. You can turn on or off various types of touch sounds and vibration on HTC U11 life.

- Touch tones when tapping the phone dial pad
- Touch sounds when tapping onscreen items
- Screen lock sounds
- Pull-to-refresh sounds
- Vibration when pressing navigation buttons
- Touch sound and vibration when tapping the keyboard

### Turning touch sounds and vibration on and off

1. From the Home screen, swipe up and then tap **Settings > Sound & notification**.
2. Tap **Advanced**.
3. Under Other sounds and vibrations, select the options you want to turn on or off.

### Turning off keyboard sounds and vibration

1. From the Home screen, swipe up and then tap **Settings > Language & keyboard**.
2. Tap **Virtual keyboard - TouchPal - HTC Sense Version > General settings**.
3. On the General settings screen, do one of the following:
   - Tap **Keypress sound**, clear **System Volume**, and then drag the slider all the way to the left to turn off keyboard sounds.
   - Tap **Keypress vibration**, clear **System default**, and then drag the slider all the way to the left to turn off keyboard vibration.
4. Tap **OK**.

Changing the display language

Changing the language adjusts the keyboard layout, date and time formatting, and more.

You can choose several languages and specific dialects so that apps with localized content will display correctly.

1. From the Home screen, swipe up and then tap **Settings > Language & keyboard**.
2. Tap **Languages**. The first language in the list is the default display language.
3. Tap **Add a language** to add another language to the list, and then select the regional variant of the language.
4. Tap OK to set the added language as your new default display language, or No (just add to list).

5. To remove languages from the list, tap \( \Rightarrow \) Remove and then select the languages you want to remove.

You can also press and hold \( \equiv \) next to the language you want, and drag it to the beginning of the list to set it as your display language.
Assigning a PIN to a nano SIM card

You can help to protect the nano SIM card by assigning a Personal Identification Number (PIN).

Make sure you have the default PIN provided by your mobile operator before continuing.

1. From the Home screen, swipe up and then tap **Settings > Security**.
2. Depending on the phone model, do the following:
   - **Single SIM model**: Tap **SIM card lock**.
   - **Dual SIM model**: Select which card you want to assign a new PIN to.
3. Tap **Lock SIM card**, enter the default PIN of the card, and then tap **OK**.
4. Tap the Lock SIM card **On/Off** switch to turn it on. Enter the default PIN of the card, and then tap **OK**.
5. To change the card PIN, tap **Change SIM PIN**.

Restoring a nano SIM card that has been locked out

If you enter the wrong PIN more times than the maximum number of attempts allowed, the card will become “PUK-locked.”

You need a Pin Unlock Key (PUK) code to restore access to HTC U11 life. Contact your mobile operator for this code.

1. On the Phone dialer screen, enter the PUK code, and then tap **Next**.
2. Enter the new PIN you want to use, and then tap **Next**.
3. Enter the new PIN again, and then tap **OK**.
Setting a screen lock

Help protect your personal information and help prevent others from using HTC U11 life without your permission.

Choose to set a screen lock pattern, numeric PIN, or other means of locking your phone. You’ll be asked to unlock the screen every time HTC U11 life is turned on or when it’s idle for a certain period of time.

1. From the Home screen, swipe up and then tap Settings > Security.
2. Under Device security, tap Screen lock.
3. Select a screen lock option and set up the screen lock.
4. Beside Screen lock, tap Automatically lock, then specify the idle time before the screen locks.

If you’ve set up a screen lock pattern and you don’t want the pattern to display onscreen as you draw it, tap and tap the Make pattern visible On/Off switch to turn it off.

Setting up Smart Lock

Use Smart Lock as an alternative way to unlock your phone, in the event you forget your password, PIN, or pattern. Set Smart Lock to unlock your phone when the phone recognizes your face or voice. You can also set it to keep your phone unlocked in certain situations, such as when the phone is with you and you’re in a trusted location.

1. From the Home screen, swipe up and then tap Settings > Security.
2. Tap Smart Lock.

You need to have a screen lock set up before you can use Smart Lock. If you haven’t set up a screen lock, tap Screen lock. This will be your alternate screen lock method.

3. Confirm your screen lock.
4. Choose whether to unlock your phone through voice or facial recognition, or keep the phone unlocked when:
   - You’re carrying the phone
   - You’re in a trusted location such as your home or office
   - The phone is connected to a trusted device such as your Bluetooth watch or car system
5. Follow the onscreen instructions, and then press to return to the Security screen.
6. Under Device security, tap to the right of Screen lock, tap Automatically lock, and then specify the idle time before the screen is locked.

To help make Smart Lock more reliable and more secure when using facial recognition, you can train HTC U11 life to recognize your face in different situations, such as when you’re wearing glasses or sporting a beard.
Tap **Smart Lock**, confirm your screen lock, then tap **Trusted face > Improve face matching**. Follow the onscreen instructions.

**Turning the lock screen off**

Rather not have to unlock your phone every time you wake it up? You can turn the lock screen off in **Settings**.

It is recommended that you have a screen lock to help secure your phone from unwanted access.

1. From the Home screen, swipe up and then tap **Settings > Security**.
2. Under Device security, tap **Screen lock**.
3. Enter or confirm your lock screen, and then tap **None > Yes, remove**.

To turn lock screen on again, tap **Screen lock** again to set one.
Accessibility settings

Accessibility features

HTC U11 life comes with features and settings that allow easy access and use of apps and functions.

Improve screen readability

If you have low vision, take advantage of these features to help improve screen readability.

- Increase the font and display size, use color inversion and color correction, or enable high-contrast text using the Accessibility settings.
- Turn magnification gestures on. See Turning Magnification gestures on or off on page 159.
- Turn on automatic screen rotation. See Automatic screen rotation on page 151.

Enhance the audio

If you’re hard of hearing, these audio-related features make listening to HTC U11 life clearer and more comprehensible.

You can find these options in the Accessibility settings of your phone. For more information, see Accessibility settings on page 159.

- Use TalkBack to hear audible feedback on what you do on your phone. See TalkBack on page 159.
- Enable Select to Speak so your phone speaks selected items on the screen like texts or images.
- When using headphones, you can control the sound balance or enable mono audio when using a single headphone.
- Turn on Unread notification reminder so your phone plays a sound or vibrates on set intervals when you have an unread notification.

Enable hearing aids and sidetone

If you wear a hearing aid or are hearing impaired, you can enable these options in Settings > Call:

- Select Hearing aids to enable hearing aid compatibility that amplifies your phone’s in-call volume
- Select Sidetone to receive controlled feedback through the phone’s earpiece, helping you modulate your voice so that it’s neither too loud nor too soft.

Use your voice

You can use your voice to perform an action on HTC U11 life.
- Call a contact using your voice. See Making a call with your voice on page 88.
- Search for information on the Web using Google Voice Search.
- Enter text with your voice. See Entering text by speaking on page 47.
- Set up a personal digital assistant or a cloud-based voice service that performs certain functions and provides information through voice commands.

Use Motion Launch

Motion Launch combines a motion and finger gesture to perform an action such as waking HTC U11 life from sleep mode or launching the camera. For details, see Motion Launch on page 43.

Accessibility settings

Use these settings to turn accessibility functions or services on or off. When you’ve downloaded and installed an accessibility tool, such as a screen reader that provides voice feedback, you can also control them using these settings.

1. From the Home screen, swipe up and then tap Settings > Accessibility.
2. Tap or select the settings you want.

Turning Magnification gestures on or off

If you have low vision or would like to get a closer view of what’s on the screen, use finger gestures to magnify portions of your phone’s screen.

1. From the Home screen, swipe up and then tap Settings > Accessibility.
2. Tap Magnification.
3. Read or listen to the instructions on how to use the gestures to zoom in or out.
4. Tap the On/Off switch to turn magnification gestures on or off.

TalkBack

Use TalkBack if you need to navigate HTC U11 life by spoken feedback. When you touch the screen, HTC U11 life vibrates and gives you an audible response so you know what you are touching.

Not all languages are supported.

Turning TalkBack on

1. From the Home screen, swipe up and then tap Settings > Accessibility.
2. Tap TalkBack, and then tap the On/Off switch.
3. Read the items and features on your phone that TalkBack will have access to, and then tap OK.

4. Listen through the tutorial explaining how to use TalkBack.

TalkBack works best if you turn off automatic screen rotation.

Turning Explore by touch on or off

Explore by touch allows HTC U11 life to respond to TalkBack gestures and screen touches with audible feedback. Explore by touch is enabled when you turn on TalkBack.

The steps below are described using the regular gestures. Use the corresponding TalkBack gestures if you already have TalkBack turned on.

Follow these steps if you want to turn off Explore by touch:

1. From the Home screen, swipe up and then tap Settings > Accessibility.
2. Tap TalkBack, and then tap Settings.
3. Under Touch exploration, tap the On/Off switch next to Explore by touch, and then tap OK.

When Explore by touch is disabled, HTC U11 life will no longer respond to TalkBack gestures or speak screen touches.

Using TalkBack gestures

When TalkBack and Explore by touch are turned on, the regular touch gestures are replaced by the TalkBack gestures.

Media gestures such as 3-finger swiping may not be available when TalkBack gestures are enabled.

Do one of the following:

<table>
<thead>
<tr>
<th>To</th>
<th>Do this</th>
</tr>
</thead>
</table>
| Open an item            | 1. Drag your finger on the screen to find and select the item.  
|                         | 2. Double-tap anywhere on the screen to open the item.                                                          |
| Move an item            | 1. Drag your finger on the screen to find the item.  
|                         | 2. Double-tap anywhere on the screen, but don’t lift your finger on the second tap.  
|                         | 3. Drag the item to a new spot and then lift your finger.                                                        |
| Scroll through a screen | Use two fingers to swipe up, down, left or right.                                                                  |
| Unlock the lock screen  | Use two fingers to swipe up from the bottom of the screen.                                                        |
| Open the Notifications  | Use two fingers to swipe down from the top of the screen.                                                          |
Assigning TalkBack shortcuts

TalkBack has customizable gestures that can be used to open the Notifications panel, view recent apps, access TalkBack controls, and more.

1. From the Home screen, swipe up and then tap Settings > Accessibility.
2. Tap TalkBack, and then tap Settings > Gestures.
3. Tap any of the shortcut gestures, and then select an action.

Using TalkBack context menus

TalkBack has a global context menu for controlling continuous reading and TalkBack controls and a local context menu for controlling the selected text or item on the screen. These menus can be accessed using TalkBack shortcut gestures.

1. From the Home screen, swipe up and then tap Settings > Accessibility.
2. Tap TalkBack, and then turn it on.
3. Do one of the following:
   - To open the global context menu, use one finger to swipe down and right in one continuous movement.
   - To open the local context menu, use one finger to swipe up and right in one continuous movement.

   If you already changed the TalkBack shortcut gestures, check your TalkBack settings for the appropriate gesture.

4. Double-tap an item on the menu to select.

Changing the TalkBack reading speed and pitch

The steps below are described using the regular gestures. Use the corresponding TalkBack gestures if you already have TalkBack turned on.

1. From the Home screen, swipe up and then tap Settings > Accessibility.
2. Tap TalkBack, and then tap Settings > Text-to-speech settings.
3. Drag the Speech rate or Pitch sliders to the right to increase or left to decrease.
4. Tap Play to hear the speech rate and pitch you’ve set.

Tap Reset to revert the settings to their default values.
TalkBack language settings

1. From the Home screen, swipe up and then tap **Settings > Accessibility**.

2. Tap **TalkBack**, and then tap **Settings > Text-to-speech settings**.

3. Do any of the following:

<table>
<thead>
<tr>
<th>To</th>
<th>Do this</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Select a different language</strong></td>
<td>Tap <strong>Language</strong>, and then select your preferred language on the list.</td>
</tr>
<tr>
<td><strong>Install a voice</strong></td>
<td>Tap 🗃 next to <strong>Preferred engine</strong>, and then tap <strong>Install voice data</strong>. Tap the language you want to install, and then tapungeon. When installation is completed, press 📣 to go back to the Text-to-speech settings screen and tap <strong>Language</strong>.</td>
</tr>
</tbody>
</table>

้าง Not all languages are supported.

Teletypewriter (TTY) mode

TTY mode allows people who have hearing or speech impediments to communicate by telephone. HTC U11 life is compatible with select TTY phones. Contact your TTY phone manufacturer to see if the phone supports digital wireless transmission. HTC U11 life and the TTY phone connect using a special cable that may come with the TTY phone. If this cable was not provided with your TTY phone, contact your TTY phone manufacturer to purchase the connector cable.

Most TTY phones connect via a 2.5 mm headset jack adapter. HTC provides a 2.5 mm headset jack adapter that connects to the USB Type-C port on HTC U11 life. To request this adapter, contact HTC by chat or email at htc.com/us/support.

Turning TTY mode on

1. Connect the TTY phone cable plug to the HTC U11 life headset jack.

2. From the Home screen, swipe up and then tap **Settings > Call**.

3. Tap **TTY mode**.

้าง When turned on, TTY mode may impair the audio quality of non-TTY phones connected to the headset jack.
