**HTC Desire 650**

___ Inserting nano SIM and microSD cards

**IMPORTANT:**
**Use a standard nano SIM only.**
Don’t cut a micro or regular SIM card and insert it into the nano SIM slot. It’s thicker than the standard nano SIM card and may get stuck in the slot.

**Don’t disassemble any part of the phone.**
Don’t try to open the phone or remove the battery by force. This may damage the phone or its electronics and will invalidate the warranty.

**Don’t throw the tray away.**
You need it to insert your nano SIM card.

---

1. Make sure your phone is off and is facing down. Open the slot cover with your finger.

2. To remove the tray from the nano SIM slot, insert your fingernail in the small groove in the tray and then pull the tray out.

3. Place your nano SIM card into the tray with the gold contacts facing up and the cut-off corner facing out.

When reinserting the tray, make sure it is facing up so that the nano SIM card doesn’t fall out. Slide the tray all the way into the slot.
4. Insert your microSD™ card into the bottom slot, with the gold contacts facing up and towards the slot. Slide the card all the way in until it clicks into place.

5. Close and press the slot cover to secure it in place.

___ Restarting the phone

To restart your phone when it doesn’t respond to touch screen or button presses, press and hold the POWER and VOLUME DOWN buttons for at least 12 seconds. When the phone restarts, release the buttons.

___ Need help?

Check out our friendly walkthroughs and self-help in troubleshooting basic problems with the HTC Help app. From the Home screen, tap ☰️, and then find and tap Help. Or go to www.htc.com/support/ to find tutorials, the user guide, and more. Please also read the Safety and regulatory guide that’s included in the box.
